The Fund

The Value Team employs an Opportunistic Value approach, seeking companies trading at a discount to their intrinsic value, to create a high-conviction portfolio comprised of leading companies.

The Approach

Using a bottom-up, fundamental investment approach, we seek leading companies that are mispriced, out of favor, or misunderstood by the market, and identify them by using a culture of ownership and debate within the Team.

The Features

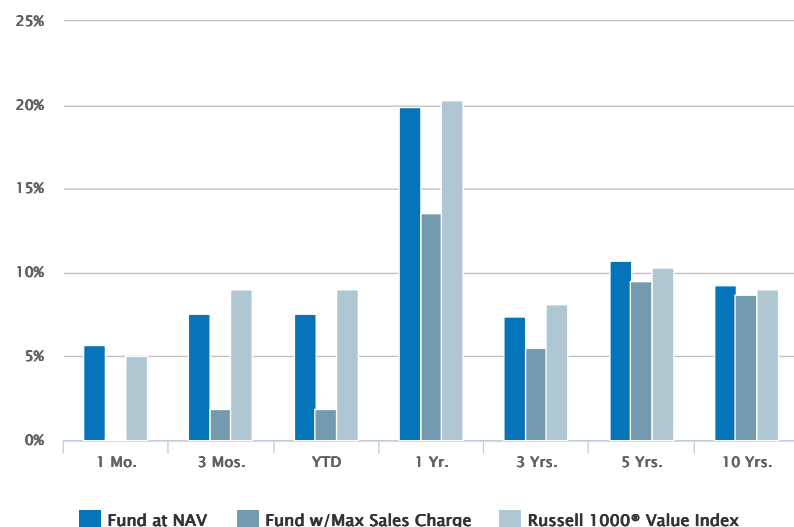

A concentrated portfolio of 25-45 leading companies that exhibit high return on invested capital, high free cash flow yield, and low debt to capital ratio, company metrics we believe have been proven to generate higher alpha over time.

Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	5.67	7.53	7.53	19.89	7.41	10.70	9.27
Fund w/Max Sales Charge	0.10	1.87	1.87	13.58	5.49	9.52	8.68
Russell 1000® Value Index ¹	5.00	8.99	8.99	20.27	8.10	10.30	9.00

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Max Sales Charge: 5.25%.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Russell 1000® Value Index is an unmanaged index of U.S. large-cap value stocks. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

2. Source: Fund prospectus.

3. Net Expense Ratio reflects a contractual expense reimbursement that continues through 6/30/24. Without the reimbursement, if applicable, performance would have been lower.

4. Top 10 Holdings excludes cash and equivalents.

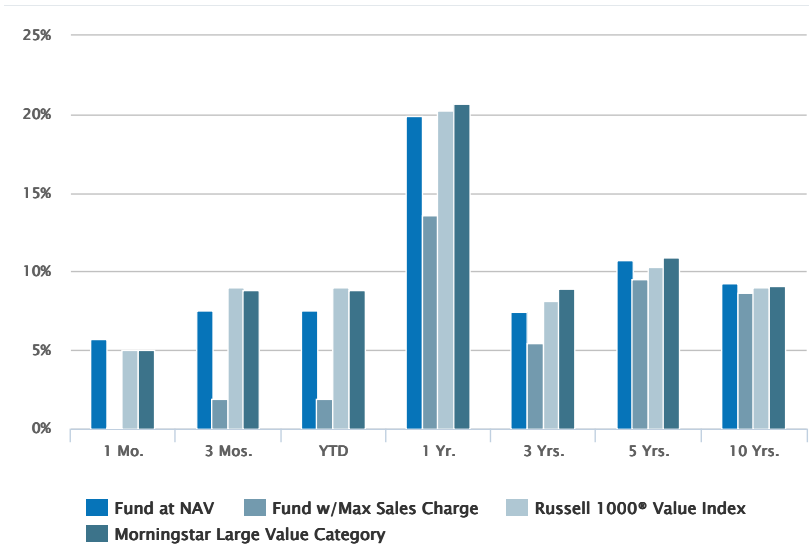

5. Percent of total net assets.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Large Value Category
-------------	--------	-------------------------------

Time Period	Rating	Funds in Large Value Category
Overall	★★★★	1118
3 Years	★★	1118
5 Years	★★★★	1058
10 Years	★★★★	816

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

1. Russell 1000® Value Index is an unmanaged index of U.S. large-cap value stocks. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

2. Source: Fund prospectus.

3. Net Expense Ratio reflects a contractual expense reimbursement that continues through 6/30/24. Without the reimbursement, if applicable, performance would have been lower.

6. The Morningstar Large Value Category includes funds that invest primarily in U.S. large-cap companies with value characteristics such as low price ratios and high dividend yields.

7. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

8. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.
