Fact Sheet

Mar 31, 2024

The Fund

The Fund seeks long-term capital appreciation by investing primarily in securities of companies that are located in India or surrounding countries of the Indian subcontinent, possibly including Pakistan and Sri Lanka. The Fund invests in companies with a broad range of market capitalizations including smaller companies.

The Approach

The Fund's investments are selected using a strong valuation discipline based on industry specific metrics, to purchase what the Fund manager believes are well-positioned, cash-generating businesses run by shareholder-oriented management teams. From a valuation perspective, the Fund manager uses proprietary estimates to determine underappreciated and undervalued companies. Allocation of the Fund's investments is determined by the Fund manager's assessment of a company's upside return potential relative to downside risk and other fund positions. Impact on sector and industry weightings is also considered.

The Features

The Fund provides investors access to a range of companies with the potential to benefit from India's competitive advantages in the global economy including its political stability, well-developed banking system, vibrant capital market, tradition of education, and strong pool of scientific and technical labor. The Fund has the ability to invest in companies with a broad range of market capitalizations.

Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	0.56	6.18	6.18	33.83	9.28	9.64	10.15
Fund w/Max Sales Charge	-4.71	0.62	0.62	26.79	7.33	8.46	9.55
MSCI India Index ¹	0.81	6.07	6.07	36.83	12.29	11.54	9.69

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Max Sales Charge: 5.25%.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in India Equity Category
Overall	★★★★★	22
3 Years	★★★★	22
5 Years	★★★★	20
10 Years	★★★★★	17

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

Portfolio Management

[Hiren Dasani, CFA](#)

[Managed Fund since 2017](#)

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. Fund invests in an affiliated investment company (Portfolio) with the same objective(s) and policies as the Fund. References to investments are to the Portfolio's holdings.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. The securities markets in the India region are comparatively undeveloped and may be concentrated in certain sectors. Governmental actions in India can have a significant affect on economic conditions in the India region. A non-diversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares may fluctuate more than a fund with less exposure to such areas. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

2. Source: Fund prospectus.

5. The Morningstar India Equity Category includes funds that invest primarily in Indian equities.

6. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

7. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.
