Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	0.36	0.66	0.66	4.99	-2.43	1.48	5.36
Market Price	1.44	5.81	5.81	6.32	-4.98	1.14	3.80

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. The Fund's performance at market price will differ from its results at NAV. Returns are historical and are calculated by determining the percentage change in net asset value or market price (as applicable) with all distributions reinvested and includes management fees and other expenses. Until the reinvestment of Fund distributions is completed, returns are calculated using the lower of the net asset value or market price of the shares on the distribution ex date. Once the reinvestment is complete, returns are calculated using the average reinvestment price. Performance less than or equal to one year is cumulative.

Distribution Rates¹

as of Apr 16, 2024

Distribution Rate at NAV	4.96%
Taxable-Equivalent Distribution Rate at NAV	8.37%
Distribution Rate at Market Price	5.59%
Taxable-Equivalent Distribution Rate at Market Price	9.45%

Interest and Fee Expense	1.72
Total Expenses	2.70

Portfolio Management

William J. Delahunty, CFA	Managed Fund since 2021
Cynthia J. Clemson	Managed Fund since 2015

The information included herein does not reflect securities deemed to be held by the Fund pursuant to financial accounting standard 140 (FAS 140).

The information contained herein is provided for informational purposes only and does not constitute a solicitation of an offer to buy or sell Fund shares. Common shares of the Fund are only available for purchase and sale at current market price on a stock exchange. There is no assurance that the Fund will achieve its investment objective. The Fund is subject to numerous risks, including investment risks. Shares of closed-end funds often trade at a discount from their net asset value. The Fund is not a complete investment program and you may lose money investing in the Fund. An investment in the Fund may not be appropriate for all investors. Investors should review and consider carefully the Fund's investment objective, risks, charges and expenses.

The premium/discount is calculated as [(market price/NAV)-1].

Eaton Vance Distributors, Inc., Member FINRA/SIPC, is an affiliate of Eaton Vance Management.

RISK CONSIDERATIONS

The value of investments held by the Trust may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. There generally is limited public information about municipal issuers. As interest rates rise, the value of certain income investments is likely to decline. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Because the Trust may invest significantly in a particular sector, the NAV of the Trust's shares may fluctuate more than a fund with less exposure to such sector. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. The Trust's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Trust), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Trust shares may decline and/or the Trust could experience delays in the return of collateral or other assets held by the counterparty. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. The Trust may engage in other investment practices that may involve additional risks.

1. Distribution Rate at NAV and Market Price is calculated by dividing the last distribution paid per share (annualized) by NAV or market price, respectively. For National Municipal Funds, Taxable-Equivalent Distribution Rate at NAV and Market Price is calculated using a 40.8% tax rate (equals maximum individual federal tax rate adjusted for the Medicare surtax). For Single-State Municipal Funds, Taxable-Equivalent Distribution Rates also reflect maximum effective individual state income tax rates. Local income taxes that may apply are not considered. A Fund's distributions in any period may be more or less than the net return earned by the Fund on its investments, and therefore should not be used as a measure of performance or confused with "yield" or "income."

2. Interest and fee expense relates to the liability for floating rate notes issued in conjunction with residual interest bond transactions.

RISK CONSIDERATIONS

The value of investments held by the Trust may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. There generally is limited public information about municipal issuers. As interest rates rise, the value of certain income investments is likely to decline. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Because the Trust may invest significantly

in a particular sector, the NAV of the Trust's shares may fluctuate more than a fund with less exposure to such sector. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. The Trust's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Trust), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Trust shares may decline and/or the Trust could experience delays in the return of collateral or other assets held by the counterparty. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. The Trust may engage in other investment practices that may involve additional risks.

1. Distribution Rate at NAV and Market Price is calculated by dividing the last distribution paid per share (annualized) by NAV or market price, respectively. For National Municipal Funds, Taxable-Equivalent Distribution Rate at NAV and Market Price is calculated using a 40.8% tax rate (equals maximum individual federal tax rate adjusted for the Medicare surtax). For Single-State Municipal Funds, Taxable-Equivalent Distribution Rates also reflect maximum effective individual state income tax rates. Local income taxes that may apply are not considered. A Fund's distributions in any period may be more or less than the net return earned by the Fund on its investments, and therefore should not be used as a measure of performance or confused with "yield" or "income."
3. See "Tax Character of Distributions". For information about any distributions in the current year estimated to include non-dividend distributions or capital gains, please refer to [Eaton Vance Closed-End Fund Distribution Notices \(19a\)](#).
4. A nondividend or return of capital distribution may include, for example, a return of some or all of the money that an investor invested in Fund shares, which can cause the Fund's NAV to erode.

 This image indicates content designed specifically for Financial Advisors / Investment Professionals. This material is not to be used with the public.

Before investing in any Eaton Vance, Calvert or Morgan Stanley Investment Management Inc.-advised fund, prospective investors should consider carefully the investment objective(s), risks, and charges and expenses. Read the prospectus carefully before you invest or send money. For **open-end mutual funds**, the current prospectus contains this and other information. To obtain an **open-end mutual fund** prospectus or summary prospectus and the most recent annual and semiannual shareholder reports, contact your financial advisor or [download a copy here](#). For **closed-end funds**, you should contact your financial advisor. To obtain the most recent annual and semi-annual shareholder report for a closed-end fund contact your financial advisor or [download a copy here](#). To obtain an **exchange-traded fund**, ("ETF") prospectus or summary prospectus, contact your financial advisor or [download a copy here](#).

Before purchasing any **variable product**, consider the objectives, risks, charges, and expenses associated with the underlying investment option(s) and those of the product itself. For a prospectus containing this and other information, contact your investment or insurance professional. Read the prospectus carefully before investing.
