The Fund

The Fund's rules-based, top-down process seeks to take advantage of certain quantitative and behavioral characteristics of developed international markets.

Emphasis is placed on broad exposure and diversification among developed markets outside of the United States, economic sectors and issuers.

The Approach

We invest in countries by tilting the portfolio away from the highest concentrations in the market. The portfolio is rebalanced as concentrations build by seeking to sell into strength and buy into weakness.

The Features

The Fund seeks to capture gains through systematic rebalancing, while providing diversified exposure to developed markets outside the U.S. The Fund also seeks to maintain exposure across key economic sectors.

Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	2.94	2.35	2.35	9.73	1.43	5.17	4.22
MSCI EAFE Index ¹	3.29	5.78	5.78	15.32	4.78	7.32	4.79

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The sub-adviser uses proprietary investment techniques and analyses in making investment decisions for the Fund. A systematic investment process is dependent on the sub-adviser's skill in developing and maintaining that process. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. MSCI EAFE Index is an unmanaged index of equities in the developed markets, excluding the U.S. and Canada. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

2. Source: Fund prospectus.

3. Net expense ratio reflects a contractual expense reimbursement that continues through 5/31/24. Without the reimbursement, if applicable, performance would have been lower.

4. Top 10 Holdings excludes cash and equivalents.

5. Percent of total net assets.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Foreign Large Blend Category
Overall	★★	696
3 Years	★★	696
5 Years	★★	646
10 Years	☆☆☆	425

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

2. Source: Fund prospectus.

3. Net expense ratio reflects a contractual expense reimbursement that continues through 5/31/24. Without the reimbursement, if applicable, performance would have been lower.

6. The Morningstar Foreign Large Blend Category includes funds that invest primarily in stocks located in non-U.S. developed countries (generally 20% or less held in U.S.) with neither strong growth or value characteristics.

7. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

8. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

Jennifer Sireklove, CFA

Managing Director, Investment Strategy
Joined Parametric Portfolio Associates
2013

Biography

Jennifer Sireklove is managing director, investment strategy for Parametric Portfolio Associates LLC, an investment adviser and majority-owned subsidiary of Eaton Vance Corp. She leads the investment strategy team, which is responsible for all aspects of Parametric's equity-based investment strategies. In addition, she has direct investment responsibility for Parametric's emerging-market and international strategies, and chairs Parametric's Stewardship Committee. She joined Parametric in 2013.

Jennifer began her career in the investment management industry in 2003. Previously at Parametric, she helped build the firm's active ownership and custom ESG portfolio construction practices. Before joining Parametric, she worked in equity research, primarily covering the energy, utility and industrial sectors at firms including D.A. Davidson and McAdams Wright Ragen.

Jennifer earned a B.A. in economics from Reed College and an MBA in finance and accounting from the University of Chicago. She is a CFA charterholder and a member of the CFA Society Seattle.
