\$13.25 \$-0.05

NAV as of Apr 18, 2024

Fact Sheet

Mar 31, 2024

The Fund

The Fund invests worldwide in companies principally engaged in the discovery, development, production or distribution of products (or services) related to scientific advances in health care, including biotechnology, pharmaceuticals, diagnostics, managed health care, and medical equipment and supplies.

The Approach

The portfolio managers seek to purchase stocks that are reasonably priced in relation to their fundamental value and that the portfolio managers believe will grow in value over time regardless of short-term market fluctuations. The stock selection process is based on numerous factors, including the potential to increase market share (for larger companies), and the potential of research and development projects (for smaller companies). The team is based in Boston and London.

The Features

Growth in the health care sector is led by aging demographics, innovation and rising global incomes. As the global population ages and becomes wealthier, we believe health care spending is likely to continue to rise. Innovation drives growth in the sector, as increased scientific understanding leads to new breakthroughs.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Max Sales Charge: 5.25%.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Health Category
Overall	★★★★★	159
3 Years	★★★★★	159
5 Years	★★★★★	136

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Because the Fund investments may be concentrated in a particular industry, the Fund share value may fluctuate more than that of a less concentrated fund. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. MSCI World Health Care Index is an unmanaged index of health care sector equities within the MSCI World Index. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.
2. Source: Fund prospectus.
3. Net expense ratio reflects a contractual expense reimbursement that continues through 12/31/24. Without the reimbursement, if applicable, performance would have been lower.
4. Top 10 Holdings excludes cash and equivalents.
5. Percent of total net assets.

2. Source: Fund prospectus.
3. Net expense ratio reflects a contractual expense reimbursement that continues through 12/31/24. Without the reimbursement, if applicable, performance would have been lower.
6. The Morningstar Health Category includes funds that invest in companies in the medical and health-care industries.
7. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.
8. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.
