Did You Know?

There are three main considerations to determining optimal asset location: the type of account, the tax efficiency of the investment assets and the type and frequency of taxable events the investment(s) will experience.

Key Takeaway

Asset location is crucial in helping your client reduce their taxable income, generate tax-advantaged growth and keep more of what they've worked so hard to save.

Asset Tax Exposure

Compare the applicable taxes and possible asset locations for each level of tax exposure.

	Applicable Taxes	Possible Asset Locations	Overview
 <p>Asset Tax Exposure High</p>	<ul style="list-style-type: none"> • Ordinary income • Taxable interest • Non-qualified dividend income 	<ul style="list-style-type: none"> • Roth IRA or Roth 401(k) • Traditional IRA or 401(k) 	<p>Investment income subject to taxation should be located where it can't be taxed. Placing these income sources in an account that isn't taxed annually allows all of the interest to compound.</p>
 <p>Asset Tax Exposure Medium</p>	<ul style="list-style-type: none"> • Short-term capital gain • Long-term capital gain • Qualified dividend income 	<ul style="list-style-type: none"> • Can work almost anywhere with a forward-looking, tax-aware approach, such as using capital losses to reduce taxable capital gains and holding assets to more favorable long term capital gain rates if possible.* 	<p>Capital gains are a special category. If your client expects gains to be distributed annually, they may belong in a tax-deferred retirement account. If those gains can be offset with realized losses, they may instead belong in a fully taxable account where they can enjoy the offset.*</p>
 <p>Asset Tax Exposure Low</p>	<ul style="list-style-type: none"> • Tax-exempt income 	<ul style="list-style-type: none"> • Taxable brokerage account 	<p>Investment income that is subject to little or no annual tax may be suitable for holding in a fully taxable brokerage account. For example certain types of tax-advantaged investments such as municipal bonds.</p>

Next Step

Review clients' and prospects' accounts, and consider what asset location changes might be appropriate to help create tax-advantaged outcomes.
