[China's Economy: Ghosted](#)

By: *Emerging Markets Debt* | August 25, 2023

Boston - In recent years, President Xi Jinping has been closing the loop on China's multi-year cycle of slowing growth, credit stimulus, overinvestment in property and consequent contraction. He drew a red line (technically three red lines) on a growth model that Chinese policymakers have probably always known to be unsustainable. While stories of ghost cities across China have been exaggerated, the "build it and they will come" strategy had devolved into corruption, money printing and growing indebtedness.

[Outlook for EM Debt Shining Brighter at Second Quarter's Start](#)

By: *Emerging Markets Debt* | April 25, 2023

Boston - Emerging markets (EM) debt produced positive performance during the first quarter of the year despite a mixed backdrop for global capital markets. [Are EM Banks Susceptible to the Same Risks as Silicon Valley Bank?](#)

By: *Nikolai K. Dimitrov, CFA* | April 6, 2023

New York - The recent collapse of Silicon Valley Bank (SVB) and Credit Suisse underscores the resilience of emerging markets (EM) banks, which operate in fundamentally different ways. While emerging markets are not immune to the heightened volatility in the macro economy from the recent bank failures and are subject to the heightened risks associated with investing in emerging markets compared to more developed economies, we believe wider contagion to EM banks is limited.
