Listed Infrastructure has Potential for Resilient Earnings and Strong Cash Flow

KEY POINTS

1. Most infrastructure companies have some form of inflation protection embedded into their contract structure.
2. An interest rate tailwind for valuations is likely if long-term interest rates peak and moderate.
3. We have started to move toward a more defensively positioned portfolio, lowering exposures to energy and certain aspects of transportation (for example, freight), while increasing investments in utilities and communications.

2. Unprecedented levels of investment and innovation in climate startups in recent years has led to a deep and maturing pipeline of highly attractive, decarbonization focused growth-stage companies.

Strong Fundamentals Offset Capital Market Weakness for High-Quality Assets

KEY POINTS

- 1 Strong fundamentals continue to offset capital market weakness for high-quality assets, even as capital flows back into equities and fixed income.
- 2 On the horizon are more dynamic and highly leveraged markets, ESG retrofit opportunities to optimize asset energy efficiencies, and arbitrage between public and private markets and funds seeking liquidity.
- 3 We see potential for distressed or forced selling in the weakening environment, as well as increased M&A activity between public and private companies.

This Too Shall Pass

KEY POINTS

- 1 While macro factors may be driving performance over the short-term, we continue to be focused on the fundamentals of our portfolio companies and their long-term compounding potential.
- 2 In our view, equities will likely outperform over the long term because they provide ownership in the creativity, ingenuity and productivity of hundreds of thousands of talented workers.
- 3 We believe a higher cost of capital will lead to fewer market entrants and less competition, which should benefit companies that have already established valuable businesses and brands.

KEY POINTS

Capturing Elevated Yields Without Longer Duration or Lower Quality

KEY POINTS

- 1 We expect credit spreads to remain range-bound in 2023, limited by macro uncertainty, while the anticipated lack of economic destruction means spreads are unlikely to make new wides.
- 2 We believe investment grade credit yields are at levels that meet investor goals, without the need to extend duration or move down in credit quality.
- 3 Uncertainty is expected to decrease as central banks pivot to a more balanced policy mix focused on growth and inflation, and cost increases become less challenging for corporate planning.

- 3 In 2023, loans offer the opportunity for high income, capital appreciation and participation in the rising rates that may lie ahead.

- 2 Higher-coupon agency MBS yields are now close to 6% for the first time since the early 2000s.
- 3 To mitigate against the risk to our higher-coupon theme from prepayments in 2023, we are moving to specified pools that can offer pay-up convexity¹ on top of attractive spreads.

Opportunities in Emerging Markets, Navigating Beyond China

KEY POINTS

- 1 Emerging markets (EM) have better growth, lower inflation, and less sovereign and private debt, yet EM equities and currencies trade at crisis-level valuations.
- 2 Despite the slowdown in China, we expect many other EM countries to see an acceleration in growth, which will drive earnings and market share.
- 3 The growth story is underpinned by the post pandemic recovery, a manufacturing renaissance, commodity tailwinds, digitization and a favorable political cycle.
- 4 We believe that most investors are under-allocated to EM, considering the potential returns from this asset class.
