Multi-Asset Credit Strategy

Quarterly Strategy Profile

(as of Mar 31, 2023)

Investment Overview

The Multi-Asset Credit Strategy invests predominantly in global subinvestment grade bond markets, across corporate, sovereign and securitized issuers.

For the Multi-Asset Credit I Strategy, the core allocation includes global high yield corporate bonds and bank loans. For the Multi-Asset Credit II Strategy, the core allocation includes global high yield corporate bonds and bank loans as well as emerging markets debt (hard currency)

The Multi-Asset Credit strategies seek to provide the following:

- Income generation
- Diversification from investment-grade bond allocations
- Dynamic asset allocation
- Ease the governance constraints our investors face
- A custom credit solution for institutional investors

Portfolio Construction

The strategies follow a process of Intelligent Integration, combining top-down and bottom-up portfolio construction, using an active approach to take advantage of credit dislocations, with flexibility to allocate across risk-reducing and opportunistic credit asset classes.

Designed for institutional investors, we believe that the philosophy and process are robust and repeatable with a number of implementation options available for institutional investors, managed against a range of different benchmarks.
