### [2024 Outlook: Emerging Markets Debt](#)

December 6, 2023

#### **Technical Tailwind Expected for Emerging Markets Debt in 2024**

##### **KEY POINTS**

1. Many emerging markets (EM) central banks were early and more aggressive in tightening policy than their developed market peers, which is helping to tame inflation and opening the way for more growth-friendly policy.
2. We expect net inflows to rebound into EM debt in 2024, providing a technicals tailwind for the asset class.
3. The asset class remains susceptible to macro sensitivity, which places an added emphasis on in-depth country and company research to guide judicious credit selection.
