Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Source: Eaton Vance and RIMES.

About Risk:

Eaton Vance International (Ireland) Emerging Markets Local Income Fund (the "Fund") share values are sensitive to stock market volatility, adverse market, economic, political, regulatory, geopolitical and other conditions. In international markets, these risks may be more significant. An imbalance in supply and demand in the income market may result in valuation uncertainties and greater volatility, less liquidity, widening credit spreads and a lack of price transparency in the market. Investments in income securities may be affected by changes in the creditworthiness of the issuer and are subject to the risk of nonpayment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Derivative instruments can be used to take both long and short positions, be highly volatile, result in economic leverage (which can magnify losses), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. As interest rates rise, the value of certain income investments is likely to decline. Because the Fund investments may be concentrated in a particular geographic region or country, the Fund share value may fluctuate more than that of a less concentrated fund. A nondiversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund. Investments rated below investment grade (typically referred to as "junk") are generally subject to greater price volatility and illiquidity than higher-rated investments. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. J.P. Morgan Government Bond Index Emerging Market (JPM GBI-EM) Global Diversified is an unmanaged index of local-currency bonds with maturities of more than one year issued by emerging markets governments. Inception date for index is 12/31/02. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. The Index may not be copied, used, or distributed without J.P. Morgan's prior written approval. Copyright 2019, J.P. Morgan Chase & Co. All rights reserved.

Cash and Cash Equivalents	5.98

Credit Quality (%)⁴

as of Oct 31, 2021

10/31/2021

Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

2. Per cent of total net assets.

3. Other net assets represent other assets less liabilities and include any investment type that represents less than 1% of net assets. Any securities sold short will be subtracted from that corresponding asset.

4. Per cent of bond holdings.

5. Absolute value by per cent of net assets. Currency exposures include all foreign exchange-denominated assets, currency derivatives and commodities.

6. External debt exposure is defined as exposure to sovereign debt, through bond or derivative investments, issued in a currency different from the currency that the sovereign entity can produce (print) itself. Absolute value by per cent of the total net assets. Includes the market value of bond holdings plus credit default swaps, valued at notional plus unrealised gains/losses.

Management

John R. Baur
Co-Director, Emerging Markets Team
Joined Eaton Vance in 2005

Biography

John Baur is a vice president of Eaton Vance Management, co-director of emerging markets and portfolio manager on Eaton Vance's emerging markets team. He is responsible for co-leading the emerging markets team with investment professionals based in Boston, Washington, D.C., London and Singapore, as well as for buy and sell decisions, portfolio construction and risk management for the firm's emerging markets strategies. He joined Eaton Vance in 2005.

John began his career in the investment management industry in 2005. Before joining Eaton Vance, he was employed by Applied Materials in an engineering capacity, spending five of his seven years at the firm in Asia.

John earned a B.S. from MIT and an M.B.A. from the Johnson Graduate School of Management at Cornell University.
