## Portfolio Management

[Stephen C. Concannon, CFA](#)

[Managed Fund since 2019](#)

[Jeffrey D. Mueller](#)

[Managed Fund since 2016](#)

[Kelley Gerrity](#)

[Managed Fund since 2014](#)

The portfolio profile is subject to change due to active management. Percentages may not total 100 % due to rounding.

The use of leverage increases risks, such that a relatively small movement in the value of an investment may result in a disproportionately large movement, unfavorable as well as favorable, in the value of that investment and, in turn, the value of the Fund.

The Investment Adviser intends that while the Fund will not seek to replicate an index, the performance of the Fund will be measured against the BofA U.S. High Yield Index (the "Index"). The Index is unmanaged and tracks the performance of below-investment-grade USD denominated corporate bonds publicly issued in the U.S. domestic market. Any change in the use of the Index will be disclosed to Shareholders via the Accounts. In addition, with respect to the Index: (i) The Investment Adviser has generally set a target outperformance for the Fund against the Index of 0.50% to 1.50% over a full market cycle; (ii) The Investment Adviser applies a tracking error guideline for the Fund of 1% to 3% relative to the Index; and (iii) The Investment Adviser applies a duration deviation guideline for the Fund of +/- 0.75 years relative to the Index. The above guidelines outlined at (i) to (iii) are not hard limits but rather are guidelines applied by the Investment Adviser in its active management of the Portfolio and may not be followed at all times or may be changed by the Investment Adviser without notice to Shareholders. To the extent that these guidelines are followed this may limit the extent to which the Fund can outperform the Index.

The investment objective of the Fund is to achieve a high level of current income. The Fund is actively managed and seeks to achieve its investment objective by investing at all times at least two-thirds of its total assets in a diversified portfolio of high yielding, fixed-income debt securities, and/or floating rate debt securities from issuers that are domiciled in or which derive more than 50% of their revenues or profits from the U.S. These fixed income debt securities and/or floating rate debt securities will be in the lowest investment grade and lower rated obligations, i.e. debt securities which are rated Baa or lower by Moody's Investors Service, Inc. The fixed-income and floating rate transferable debt securities in which the Fund may invest include all types of debt obligations such as bonds, debentures, loan notes (including promissory notes listed or traded on Recognised Markets), commercial paper, and obligations issued or guaranteed by the U.S. Government, any state or territory of the United States, any non-U.S. government or any of their respective political subdivisions, agencies or instrumentalities. Debt securities may bear fixed, fixed and contingent, or variable rates of interest.

This Fund is classified as an Article 9 product under the Sustainable Finance Disclosure Regulation. Article 9 products are those which have a sustainable investment objective and which integrate sustainability into the investment process in a binding manner.

## RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. As interest rates rise, the value of certain income investments is likely to decline. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks

associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Formally known as Eaton Vance International (Ireland) US High Yield Bond Fund.
2. ICE BofA U.S. High Yield Index is an unmanaged index of below-investment grade U.S. corporate bonds.
3. Per cent of total net assets.

NR 1.43

Credit quality ratings on underlying securities of the fund are provided by S&P, Moody's and Fitch. This breakdown assigns a numeric equivalent to the ratings from the aforementioned agencies and the average is converted back to an equivalent S&P major rating category, rounded to the nearest integer. When the ratings agencies rate a security differently, the median is used if three ratings are available and if there are only two ratings available, the lower is used. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.
