2024 Outlook: High Yield Bonds

By: Stephen C. Concannon, CFA, Will

Reardon | December 6, 2023

Higher Volatility in 2024 May
Present Attractive Entry Points
for High Yield Bonds

KEY POINTS

- 1. As global central banks near the end of a historical cycle of tightening monetary policy, we believe a moderate recession is a more probable outcome in 2024.
- 2. Increasing dispersion in valuations across rating segments, sectors and individual issuers will continue to provide opportunity and the ability to capture attractive entry points.
- 3. We have maintained our cautious positioning and continue to prefer defensive sectors that trade wide of historical norms, such as health care, given the sector's historically defensive characteristics.

- 2. Optimistic households are borrowing more, causing some concern over the build-up of "China-like" debt risks.
- 3. While higher private capex would help boost economic activity, the current growth trend appears stable and offers potential upside for fixed income investors.
