

Calvert Global Real Estate Fund (I)

The Fund's investment objective is to seek to provide total return through a combination of long-term capital appreciation and dividend income by investing primarily in equity securities of companies in the real estate industry located throughout the world, including real estate investment trusts, real estate operating companies, foreign real estate companies, companies with substantial real estate-related holdings and/or companies whose products or services are related to the real estate industry. The adviser will invest in those securities in the global real estate industry determined to have the best forward total return potential based upon relative valuation and environmental, social and governance considerations.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. The share class has no sales charge.

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry including REITs. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. A non-diversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. The FTSE EPRA Nareit Developed Extended Net Total Return Index is a market capitalization weighted index designed to represent general trends in eligible real estate stocks worldwide. Relevant real estate activities are defined as the ownership, trading and development of income-producing real estate. The FTSE EPRA Nareit Developed Extended Index represents the extension of real estate property sectors (e.g. Infrastructure and Timber) and additional securities beyond what is currently eligible for the FTSE EPRA Nareit Developed Index. The performance of the Index is listed in U.S. dollars and assumes reinvestment of dividends.
2. Source: Fund prospectus.
3. Net expense ratio reflects a contractual expense reimbursement that continues through 04/30/24. Without the reimbursement, if applicable, performance would have been lower.
4. Top 10 Holdings excludes cash and equivalents.
5. Percent of total net assets.
