The Fund

Managed by Eaton Vance, a pioneer in floating rate loans since 1989, this portfolio diversifier provides broad exposure to the floating rate loan market. In depth, bottom up credit research and broad diversification¹ are this Fund's cornerstones, managed by one of America's largest and most experienced loan managers.

The Approach

Invests broadly across the floating rate loan market, providing diversified exposure to the asset class. Provides exposure to the loan market's many sectors, credit tiers and issuers. Fund also provides exposure to high-yield corporate bonds, which may increase risk and return potential. High-yield bond exposure is limited to no more than 20% of Fund assets.

The Features

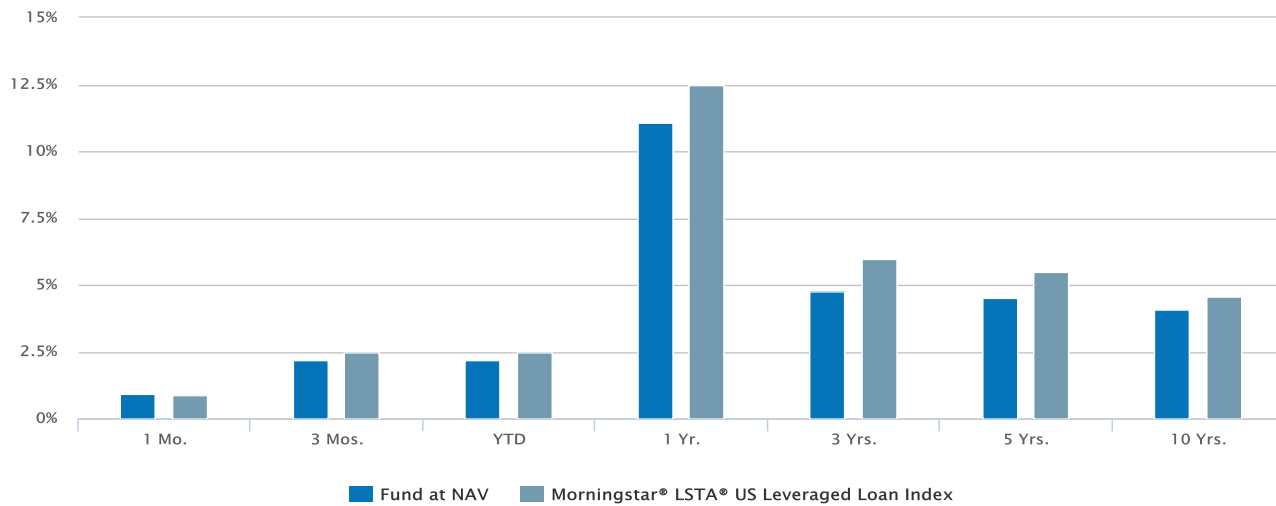

Floating rate loans have typically performed with low correlation to traditional equity and fixed income markets, providing important diversification benefits for investor portfolios. Low duration and loans' floating rate structure may help reduce interest rate risk and lower portfolio volatility.

Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	0.94	2.19	2.19	11.06	4.74	4.50	4.09
Morningstar® LSTA® US Leveraged Loan Index ²	0.85	2.46	2.46	12.47	5.99	5.47	4.54

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. The share class has no sales charge.

Top 10 Issuers and Sectors are shown as a percentage of Floating Rate Portfolio's total investments.

RISK CONSIDERATIONS

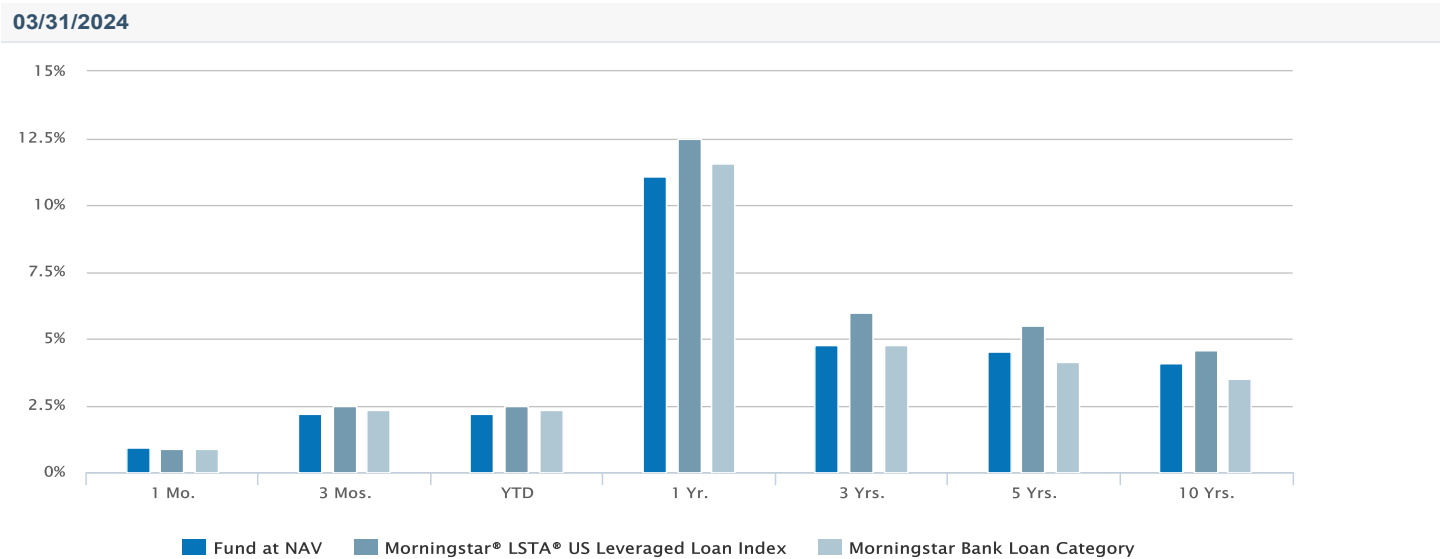

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. Loans are traded in a private, unregulated inter-dealer or inter-bank resale market and are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans (thus affecting their liquidity) and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. Due to the possibility of an extended loan settlement process, the Fund may hold cash, sell investments or temporarily borrow from banks or other lenders to meet short-term liquidity needs. Loans may be structured such that they are not securities under securities law, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. Loans are also subject to risks associated with other types of income investments. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. As interest rates rise, the value of certain income investments is likely to decline. The London Interbank Offered Rate or LIBOR, is used throughout global banking and financial industries to determine interest rates for a variety of financial instruments (such as debt instruments and derivatives) and borrowing arrangements. The ICE Benchmark Administration Limited, the administrator of LIBOR, ceased publishing certain LIBOR settings on December 31, 2021, and is expected to cease publishing the remaining LIBOR settings on June 30, 2023. The transition process may involve, among other things, increased volatility or illiquidity in markets for instruments that currently rely on LIBOR, such as floating-rate debt obligations. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Bank Loan Category
Overall	★★★★	214
3 Years	★★★★	214
5 Years	★★★★	206
10 Years	☆☆☆☆	169

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

2. Morningstar LSTA US Leveraged Loan TR USD Index is an unmanaged index of the institutional leveraged loan market. Prior to August 29, 2022, the index name was S&P/LSTA Leveraged Loan Index. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

3. Source: Fund prospectus.

5. The Morningstar Bank Loan Category includes funds that invest primarily in floating-rate bank loans, instead of bonds, with interest payments that typically float above a common benchmark.

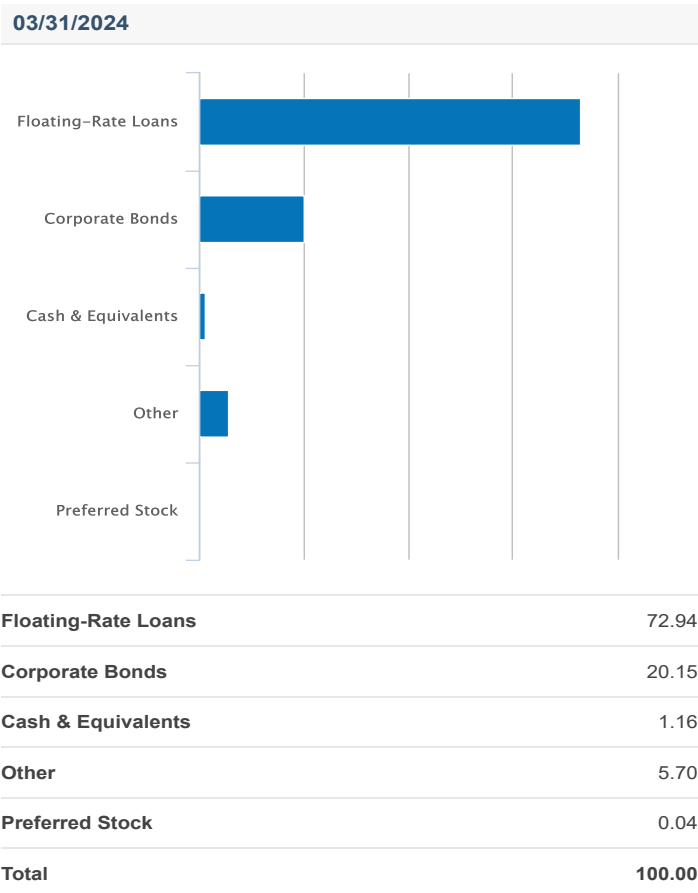

6. SEC 30-day yield is a standardized measure based on the estimated yield to maturity of a fund's investments over a 30-day period and is based on the maximum offer price at the date specified. The SEC 30-day yield is not based on the distributions made by the fund, which may differ. Distribution Rate at NAV is calculated by dividing the last distribution paid per share (annualized) by NAV. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.

7. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

Not Rated	6.25
Total	100.00

Credit quality ratings on underlying securities of the fund are provided by S&P, Moody's and Fitch. This breakdown assigns a numeric equivalent to the ratings from the aforementioned agencies and the mean is rounded to the nearest integer and converted to an equivalent S&P major rating category. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of an issuance based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

4. Shown as a percentage of Floating Rate Portfolio's total investments.

8. Percent of total net assets.

9. Percent of bond and loan holdings.

10. The "Equity/Other" category includes securities that have no maturity date. Cash & equivalents are included within the "Less Than 1 Year" category.

11. Includes 87.27% Covenant-Lite Loans.

12. Second lien loans are subordinate to first lien loans and therefore have a lesser claim to collateral. Covenant-lite first lien loans do not require financial maintenance covenants.

13. Shown as a percentage of Floating Rate Portfolio's loan investments.

14. The following list reflects unaudited securities holdings (excluding derivatives positions). Holdings information may differ if presented as of trade

date. Due to rounding, holdings of less than 0.005% may show as 0.00%. Portfolio information subject to change due to active management.

15. The stated interest rate represents the weighted average interest rate of all loans made under senior loan facility and includes commitment fees on unfunded loan commitments, if any, and will vary over time.

Management

Andrew N. Sveen, CFA

Managing Director, Chairman of MSIM
Fixed Income and Head of Floating-Rate
Loans
Joined Eaton Vance 1999

Biography

Andrew Sveen is the Chairman of MSIM Fixed Income. In addition, he is the Head of Floating-Rate Loans and a portfolio manager on the Floating-Rate Loans team. He is responsible for buy and sell decisions, portfolio construction, and risk management for the firm's floating-rate loan strategies. He joined Eaton Vance in 1999. Morgan Stanley acquired Eaton Vance in March 2021.

Andrew began his career in the investment industry in 1995. Previously at Eaton Vance, he was a Director within Loan Trading and Capital Markets. Before joining Eaton Vance, he worked as a corporate lending officer at State Street Bank.

Andrew earned a B.A. from Dartmouth College and an M.B.A. from the William E. Simon School at the University of Rochester. He also holds the Chartered Financial Analyst designation. Andrew serves as a member of the Board of Directors of the Loan Syndications and Trading Association (LSTA).

Jeffrey D. Mueller

Managing Director, Co-Head of Fixed Income and Co-Head of High Yield
Joined Eaton Vance 2015

Biography

Jeffrey Mueller is Co-Head of Fixed Income. In this capacity he, along with his Co-Head, is responsible for managing the seven fixed income investment teams and developing and growing the business. In addition, Jeff is the Co-Head of High Yield and a portfolio manager on the High Yield team. In this capacity he is responsible for buy and sell decisions, portfolio construction, and risk management for the firm's High Yield and Multi-Asset Credit Strategies. He joined Eaton Vance in 2015. Morgan Stanley acquired Eaton Vance in March 2021.

Jeff began his career in the investment management industry in 2004. Before joining Eaton Vance, he was a high-yield portfolio manager with Threadneedle Investments. He was previously affiliated with Centaurus Capital Ltd. and Amaranth Advisors LLC.

Jeff earned a B.B.A. from the University of Wisconsin at Madison.
