Fact Sheet

Mar 31, 2024

The Fund

The Fund seeks to achieve long-term capital appreciation by attempting to exploit the breadth and relative inefficiencies of the international small-cap universe. The Fund looks to achieve its objective by investing primarily in high- or improving in quality companies management believes are best placed to benefit from structural growth.

The Approach

Stock selection is based primarily on a bottom-up process that identifies stocks through fundamental research. Management looks for companies well-positioned in an industry or niche benefiting from structural change, or companies with differentiated products or services that possess defensible barriers to entry, competitive advantages and scalable businesses.

The Features

The Fund employs an investment process lead by an experienced portfolio manager with a focus on stock selection as the primary driver of alpha¹ generation. The Fund also provides both geographic and economic sector diversification² within a risk-managed framework, investing in foreign developed markets. The Fund may also invest in emerging countries.

Overview

Historical Returns (%)

as of Mar 31, 2024

03/31/2024

Fund at NAV	2.41	-0.70	-0.70	6.50	-2.51	3.86	5.55
Fund w/Max Sales Charge	-2.97	-5.91	-5.91	0.93	-4.25	2.75	4.87
MSCI World ex USA Small Cap Index³	4.06	2.58	2.58	10.04	-0.93	5.38	6.20

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Max Sales Charge: 5.25%.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry including REITs. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark.
2. Diversification cannot ensure a profit or eliminate the risk of loss.
3. MSCI World ex USA Small Cap Index is an unmanaged index of small-cap equity securities in the developed markets, excluding the United States. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.
4. Source: Fund prospectus.
5. Net Expense Ratio reflects a contractual expense reimbursement that continues through 3/31/24. Without the reimbursement, if applicable, performance would have been lower.
6. Top 10 Holdings excludes cash and equivalents.
7. Percent of total net assets.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Foreign Small/Mid Growth Category
Overall	★★★★	119
3 Years	★★★★	119
5 Years	★★★★	114
10 Years		80

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

7. Percent of total net assets.

10. Active Share is a measure of the differentiation of the holdings of a portfolio from the holdings of its appropriate benchmark index. It is calculated as one half of the sum of the absolute value of the differences found between the portfolio weights and the benchmark weights.

11. The following list reflects unaudited securities holdings (excluding derivatives positions). Holdings information may differ if presented as of trade date. Due to rounding, holdings of less than 0.005% may show as 0.00%. Portfolio information subject to change due to active management.

Management

Aidan M. Farrell
Managing Director, Co-Head of Non-US
Small/Mid Cap
Joined Eaton Vance 2015

Biography

Aidan is a managing director of Morgan Stanley. He is Co-Head of the Eaton Vance Non-U.S. Small/Mid Cap team. He is responsible for managing global and international small-cap equity portfolios, leading a team of analysts. He joined Eaton Vance in 2015. Morgan Stanley acquired Eaton Vance in March 2021.

Aidan began his career in the investment management industry in 1996. Before joining Eaton Vance, he was managing director and a lead portfolio manager for Goldman Sachs Asset Management (GSAM). Prior to June 2008, he served as a director of European equities for Investment Insight (formerly the asset management arm of Halifax Bank of Scotland).

Aidan earned a B.A. in economics from the University College Dublin and a postgraduate diploma in business studies from the University College Dublin Michael Smurfit Graduate Business School. Aidan is an associate of the CFA Society of the UK.
