## A Focus on Beta Management<sup>1</sup>

A macrodriven top-down asset allocation fund that seeks to invest anywhere in the world. Piloted by Richard Bernstein, one of the most experienced and well-respected strategists in the industry, the Fund seeks to manage exposures based on both quantitative indicators and the sub-adviser's macro-economic analysis and judgment.

## Forward-Looking Themes

Driven by market themes that may differ from the consensus. The Fund seeks to identify potentially overlooked investment opportunities around the world.

## A Flexible Approach

A broadly diversified,<sup>2</sup> opportunistic, style-agnostic fund that seeks to manage security-specific and other market risks. The Fund is rebalanced as necessary to reflect desired market exposures and risk parameters.

## Overview

## Historical Returns (%)

as of Mar 31, 2024

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. The share class has no sales charge.

## RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. ETFs are subject to the risks of investing in the underlying securities and the Fund will bear a pro rata portion of the operating expenses of an ETF in which it invests. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. As interest rates rise, the value of certain income investments is likely to decline. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

See the Fund's prospectus for information related to a primary benchmark index selected (if applicable) to comply with a regulation that requires the Fund's primary benchmark to represent the overall applicable market.

1. As used herein, beta is defined as a management style that focuses on market exposure in terms of asset classes, style, sector, geography, market capitalization, and other factors.

2. Diversification cannot ensure a profit or eliminate the risk of loss.

3. Bloomberg U.S. Aggregate Bond Index is an unmanaged index of domestic investment-grade bonds, including corporate, government and mortgage-backed securities. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

4. MSCI ACWI Index is an unmanaged free-float-adjusted market-capitalization-weighted index designed to measure the equity market performance of developed and emerging markets. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

# Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Tactical Allocation Category
Overall	★★★★	231
3 Years	★★	231
5 Years	★★	211
10 Years	★★★★	141

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

## RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. ETFs are subject to the risks of investing in the underlying securities and the Fund will bear a pro rata portion of the operating expenses of an ETF in which it invests. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. As interest rates rise, the value of certain income investments is likely to decline. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Smaller companies are generally subject to greater price fluctuations, limited liquidity, higher transaction costs and higher investment risk than larger, more established companies. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

See the Fund's prospectus for information related to a primary benchmark index selected (if applicable) to comply with a regulation that requires the Fund's primary benchmark to represent the overall applicable market.

4. MSCI ACWI Index is an unmanaged free-float-adjusted market-capitalization-weighted index designed to measure the equity market performance of developed and emerging markets. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

7. Percent of total net assets.

8. The Fund may obtain exposure to certain market segments through investments in Exchange-Traded Funds (ETFs) and futures. For purposes of the asset breakdowns, allocations with respect to the Fund's investments in ETFs and futures are based on the underlying portfolio composition of each ETF and future as of the calendar quarter end.

9. Cash & Equivalents is calculated and presented net of any notional futures exposure.

10. The Fund may obtain exposure to certain foreign currencies through derivatives and/or forward contracts. These exposures may seek to hedge currency exposures and/or seek total return. These exposures are not reflected in the characteristic information shown.

11. Percent of equity holdings and cash & equivalents.

12. Weightings are calculated using individual portfolio holdings (equity-only basis) and index constituent weights. Region is based on MSCI's country/region membership methodology and, with respect to the Fund's investments in ETFs and/or futures, is based on the underlying portfolio

composition of each ETF and/or future as of the calendar quarter-end. Size is based upon float-adjusted market caps and our own range definitions of Large Cap (greater than \$20B), Mid Cap (\$5B-\$20B) and Small Cap (less than \$5B), effective June 30, 2021. Prior to that, our range definitions were Large Cap (greater than \$10B), Mid Cap (\$2B-\$10B) and Small Cap (less than \$2B). Style is based upon S&P's Global Broad Market Style Indexes. Sources: Bloomberg, Axioma Inc., Standard & Poor's, MSCI. The S&P Global BMI Style Index uses three growth variables and four value variables to classify each stock in the universe as 100% growth, 100% value, or a mixture of both growth and value. This approach permits a stock to be classified, for example, as 60% growth and 40% value, for better securities classification and less index turnover by recognizing that companies may gradually move from one style to another over time.

13. The following list reflects unaudited securities holdings. Holdings information may differ if presented as of trade date. Due to rounding, holdings of less than 0.005% may show as 0.00%. Portfolio information subject to change due to active management.

## Management

## Biography

Daniel Suzuki is the deputy CIO at Richard Bernstein Advisors LLC (RBA), a registered independent investment adviser. He is responsible for portfolio strategy, asset allocation, investment management and marketing to major wirehouses and independent RIAs, and is a senior member of the RBA investment committee. He joined RBA in 2018.

Dan began his career in the investment management industry in 2002. Before joining RBA, he worked at Bank of America-Merrill Lynch in global research, most recently as a senior equity strategist. Prior to working in strategy, Dan was a fundamental equity research analyst covering the business services sector. He is a frequent guest on CNBC, Bloomberg TV, and is often quoted in leading financial publications including The Wall Street Journal, Financial Times and Barron's.

Dan earned a B.S. from Duke University. He is a CFA charterholder.

**Richard Bernstein**  
Founder, CEO and Chief Investment  
Officer  
Richard Bernstein Advisors LLC

## Biography

Richard Bernstein is the chief executive officer and chief investment officer of Richard Bernstein Advisors LLC (RBA), a registered independent investment adviser. As CIO, he leads RBA's Investment Committee, which manages all of the firm's investments, and performs executive management functions as CEO.

Mr. Bernstein founded Richard Bernstein Advisors LLC (RBA) in 2009. The firm utilizes a unique top-down approach to investing, focusing on macro trends rather than individual stock selection. RBA manages several accounts in partnership with several leading financial institutions.

Mr. Bernstein has over 35 years' experience on Wall Street, most recently as the chief investment strategist at Merrill Lynch & Co. Prior to joining Merrill Lynch in 1988, he held positions at E.F. Hutton and Chase Econometrics/IDC.

A much-noted expert on equity, style and asset allocation, Mr. Bernstein was voted to Institutional Investor magazine's annual "All-America Research Team" 18 times, and is one of only 57 analysts inducted into the Institutional Investor "Hall of Fame." He was also twice named to both Fortune magazine's "All-Star Analysts" and to Smart Money magazine's "Power 30", and was a member of Registered Rep's "Ten to watch" for 2012. His book "Style Investing: Unique Insight into Equity Management" is widely viewed as the seminal book on style-oriented investment strategies. He donates the profits from that and his other book, "Navigate the Noise: Investing in the New Age of Media and Hype," to charity.

Mr. Bernstein is co-chair of the Alfred P. Sloan Foundation endowment's Investment Committee and sits on the Hamilton College endowment's Investment Committee; he is a trustee of both institutions. He is also a former Adjunct Professor of Finance at the NYU/Stern Graduate School of business, and is a member of the Journal of Portfolio Management's Advisory Committee.

Rich holds an MBA in finance, with Beta Gamma Sigma distinction, from New York University, and a B.A. in economics from Hamilton College. He has lectured on finance and economics at numerous colleges, universities and professional forums.

**Matthew Griswold, CFA**

Director of Investments, Portfolio Manager, Richard Bernstein Advisors LLC

### Biography

Matthew Griswold is the director of investments at Richard Bernstein Advisors LLC (RBA), a registered independent investment adviser. He oversees investment process design and implementation for all investment products. He is responsible for buy and sell decisions, portfolio construction and risk management for the firm's global equity and multiasset class funds. Matt joined RBA in 2010.

Matt began his career in the investment management industry in 1989. Previously, Matt was a vice president and portfolio manager at State Street Global Advisors, with responsibility for the design, execution and evaluation of both new and existing global investment strategies. His extensive portfolio management experience spans most major asset classes and includes both quantitative and fundamental investment disciplines. Matt assumed a wide variety of leadership positions within State Street in areas of portfolio construction, research, performance measurement, risk analysis, mutual fund administration and client service.

Matt earned a B.S. in industrial management from Carnegie Mellon University. He is a CFA charterholder and member of the CFA Society Boston.

### Biography

Henry Timmons is director of ETFs at Richard Bernstein Advisors LLC (RBA), a registered independent investment adviser. He is responsible for asset allocation, portfolio construction, risk management and ETF research. Henry joined RBA in 2011.

Henry began his career in the investment management industry in 2005. Previously, he was a portfolio manager and quantitative analyst at Grantham, Mayo, Van Otterloo & Co. LLC. While at GMO, he evaluated quantitative and fundamental sources of alpha as potential inputs to the investment process, while assisting in constructing and managing portfolios. Prior to GMO, Henry was a management consultant at PricewaterhouseCoopers LLP, where he designed forecasting models improving supply-chain management processes for various clients.

Henry holds a B.S. in mechanical engineering and an MEng in systems engineering and engineering management from Cornell University, and an MBA in finance from Cornell SC Johnson College of Business. He is a CFA charterholder.
