[Artificial Intelligence from a Value Perspective: Enabling the Evolution of Compute Power](#)

By: [Aaron Dunn, CFA](#) | & [Bradley Galko, CFA](#) | April 24, 2024

**KEY POINTS**

1. AI opportunity expands beyond the growth darlings that were the immediate and primary beneficiaries over the past year.
2. Utilities experienced the largest historical relative underperformance to the broader market in 2023; in our view, the reward relative to risk is now quite compelling for a sector that is experiencing an inflection in fundamentals.

[Bigger Bite of Corporate Taxes Would Sting Beyond Businesses' Bottom Lines](#)

By: *Eaton Vance on Washington* | April 9, 2024

Corporations would face more pressure to succeed and thrive if the U.S. Treasury Department increases corporate income taxes by nearly \$2.8 trillion, or 56%. While the additional funding aims to improve the lives of lower earners, hiking corporate taxes could slow the economy and reduce some opportunities by burdening businesses already struggling to pay for innovation and growth initiatives. A major tax hike may impede businesses from investing in technology and equipment to improve efficiency and generate higher revenue, which could boost wages and create new jobs.

## [Treasury Wants Lion's Share of High-Income Taxpayers' Retirement Savings](#)

By: [Eaton Vance on Washington](#) | March 26, 2024

High-income taxpayers are again feeling the squeeze as the U.S. Treasury Department seeks to modify rules relating to retirement plans by preventing "excessive accumulations" in tax-favored retirement accounts and slamming backdoor Roth contributions in an effort to raise \$23.6 billion between 2025 and 2034. These provisions were originally proposed to help fund the Build Back Better Act, which sought to invest \$390 billion in childcare and universal preschool initiatives.

## [What Biden's Tax Proposal Means for the Wealthiest Taxpayers](#)

By: [Eaton Vance on Washington](#) | March 14, 2024

Proposed tax increases in President Biden's budget proposal for fiscal year 2025, which includes \$4.9 trillion in higher revenue over ten years through costly tax increases on wealthy individuals and businesses, would hike U.S. tax rates and increase revenues to 20.3% of gross domestic product (GDP) by 2034, the highest rate in the nation's history. The proposed tax code includes new and higher taxes on wealthy individuals, higher-income families, and employers, including complicated tax credits, exemptions and deductions.

## [Making a Compelling Case for Core and Core Plus Strategies](#)

By: [Vishal Khanduja, CFA](#) | & [Brian S. Ellis, CFA](#) | February 20, 2024

A decade of extremely low interest rates followed by the Federal Reserve's aggressive policy normalization created a challenging environment for bond investors over the last two years. We see the environment for fixed income improving greatly from here for these reasons:

### KEY POINTS

- 1. Income:** Starting yields are near post-financial crisis highs and have been a reliable indicator of future returns.
- 2. Total Return:** The Fed has signaled a pivot from its restrictive stance, which has historically been a compelling time to increase duration in fixed income allocations.
- 3. Diversification:** Correlations between bonds and risk assets should normalize as the Fed cuts interest rates.
