Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. The Fund's performance at market price will differ from its results at NAV. Returns are historical and are calculated by determining the percentage change in net asset value or market price (as applicable) with all distributions reinvested and includes management fees and other expenses. Until the reinvestment of Fund distributions is completed, returns are calculated using the lower of the net asset value or market price of the shares on the distribution ex date. Once the reinvestment is complete, returns are calculated using the average reinvestment price. Performance less than or equal to one year is cumulative.

The information included herein does not reflect securities deemed to be held by the Fund pursuant to financial accounting standard 140 (FAS 140).

The information contained herein is provided for informational purposes only and does not constitute a solicitation of an offer to buy or sell Fund shares. Common shares of the Fund are only available for purchase and sale at current market price on a stock exchange. There is no assurance that the Fund will achieve its investment objective. The Fund is subject to numerous risks, including investment risks. Shares of closed-end funds often trade at a discount from their net asset value. The Fund is not a complete investment program and you may lose money investing in the Fund. An investment in the Fund may not be appropriate for all investors. Investors should review and consider carefully the Fund's investment objective, risks, charges and expenses.

The premium/discount is calculated as [(market price/NAV)-1].

1. Distribution Rate at NAV and Market Price is calculated by dividing the last distribution paid per share (annualized) by NAV or market price, respectively. For National Municipal Funds, Taxable-Equivalent Distribution Rate at NAV and Market Price is calculated using a 40.8% tax rate (equals maximum individual federal tax rate adjusted for the Medicare surtax). For Single-State Municipal Funds, Taxable-Equivalent Distribution Rates also reflect maximum effective individual state income tax rates. Local income taxes that may apply are not considered. A Fund's distributions in any period may be more or less than the net return earned by the Fund on its investments, and therefore should not be used as a measure of performance or confused with "yield" or "income."
2. Interest and fee expense relates to the liability for floating rate notes issued in conjunction with residual interest bond transactions.
