The Fund

This investment offering primarily provides broad exposure to a portfolio of securities issued, backed or otherwise guaranteed by the U.S. Government, or its agencies or instrumentalities. The Fund seeks to provide a core fixed income solution for investor portfolios. As a low duration strategy, the Fund offers limited interest-rate risk, as its dollar-weighted average duration will not exceed three years.

The Approach

The Fund's strategy draws upon Eaton Vance's decades of experience actively managing high-quality government bond portfolios. The investment team applies a time-tested process centered upon a combination of fundamental research and relative value trading. The Fund primarily invests in U.S. government agency mortgage-backed securities as well as U.S. government-issued Treasury bills and bonds.

The Features

Designed for income investors wishing to mitigate portfolio risk through a high-quality allocation, the Fund may be complementary to many lower-quality segments of the fixed-income markets. The Fund may serve as a core holding for building diversified income portfolios. Managed by Eaton Vance, a government bond investing leader.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Effective December 31, 2023, the Fund changed its primary benchmark to the ICE BofA 1-3 Year U.S. Treasury Index because the investment adviser believes it is a more appropriate benchmark for the Fund. Max Sales Charge: 1%.

Fund Facts

as of Mar 31, 2024

[Managed Fund since 2014](#)

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. Securities with longer durations tend to be more sensitive to interest rate changes than securities with shorter durations. As interest rates rise, the value of certain income investments is likely to decline. Mortgage- and asset-backed securities are subject to credit, interest rate, prepayment and extension risk. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. U.S. Treasury securities generally have a lower return than other obligations because of their higher credit quality and market liquidity. While certain U.S. Government-sponsored agencies may be chartered or sponsored by acts of Congress, their securities are neither issued nor guaranteed by the U.S. Treasury. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

See the Fund's prospectus for information related to a primary benchmark index selected (if applicable) to comply with a regulation that requires the Fund's primary benchmark to represent the overall applicable market.

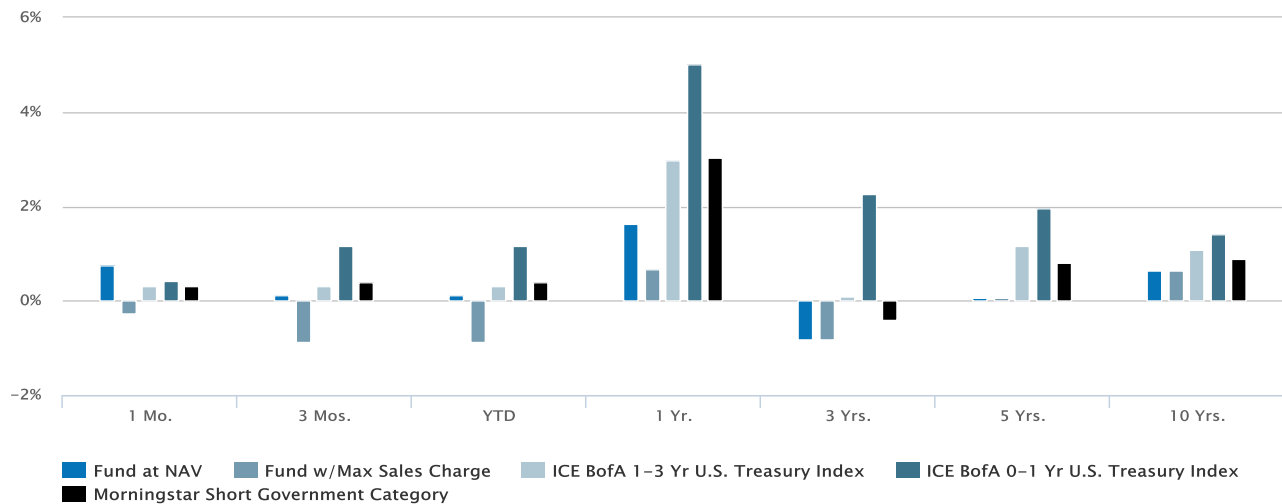

1. ICE BofA 1-3 Year U.S. Treasury Index is an unmanaged index of short-term U.S. Treasury securities. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Short Government Category
Overall	★★★	89
3 Years	★★★	89
5 Years	★★★	84
10 Years	★★★	75

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

3. Source: Fund prospectus.

4. The Morningstar Short Government Category includes funds that invest at least 90% of its assets in U.S. Government or government agency bonds and have a duration typically between 1.0 and 3.5 years.

5. SEC 30-day yield is a standardized measure based on the estimated yield to maturity of a fund's investments over a 30-day period and is based on the maximum offer price at the date specified. The SEC 30-day yield is not based on the distributions made by the fund, which may differ. Distribution Rate at NAV is calculated by dividing the last distribution paid per share (annualized) by NAV. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.

6. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

AAA	100.00
Total	100.00

Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. U.S. Treasury securities generally have a lower return than other obligations because of their higher credit quality and market liquidity. While certain U.S. Government-sponsored agencies may be chartered or sponsored by acts of Congress, their securities are neither issued nor guaranteed by the U.S. Treasury. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices.
