The Fed is Probably Done Hiking Rates, They Just Can't Tell Us Yet

November 28, 2023

KEY POINTS

1. In our view, the Federal Reserve (Fed) has to project a hawkish position on rate hikes to manage expectations and pave the way for eventual monetary easing.
2. Slowing inflation and the weakening labor market are signs that the Fed's past rate hikes are working.
3. Investors should ignore the noise coming out of the Fed and focus on the turning tide of U.S. economic data.

Calvert's Approach to Investing in the Energy Transition

November 8, 2023

The energy system powers every corner of the modern economy from oil for transport and chemicals, to natural gas for heating and industry, to coal for electricity generation and steel production. Oil and gas provide over 50% of world primary energy which rises to over 80% when including coal, forming the backbone of global supply today and highlighting the magnitude of the task of an energy system transformation. This system keeps the world moving and powers economic activity, but it is prone to geopolitical disruption and price volatility. This volatility has highlighted long-term concerns that Calvert has long held about the extent to which the current global energy system relies on fossil fuels.
