[2024 Outlook: Private Real Estate](#)

By: Morgan Stanley Real Estate Investing (MSREI) | January 4, 2024

Real Estate Investors Eye Opportunity Amid Strong Fundamentals Fueling Growth for High Quality Assets

KEY POINTS

1. Real estate has re-priced meaningfully over the last two years; returns following periods of re-pricing have typically exceeded historical averages.
2. Strength in real estate fundamentals should support rent growth for high quality assets in sectors backed by long-term demand drivers.
3. We believe debt maturities and the higher-for-longer interest rate environment will lead to idiosyncratic seller distress and attractive recapitalization/credit investment opportunities.

[2024: Private Credit Outlook](#)

By: David Miller | December 21, 2023

KEY POINTS

1. Within Direct Lending, we focus on lending to sponsors in non-cyclical industries such as software, insurance, and residential services, which can typically maintain cash flow levels through market cycles.
2. Companies are increasingly seeking junior capital solutions to manage interest expenses and boost cash flow.
3. We anticipate ongoing support for private credit through increased private equity activity.

[2024 Outlook: GPs who have been diligent about developing, pursuing, and executing on value creation processes have the opportunity to generate private equity returns at historical levels](#)

By: David Miller | December 21, 2023

KEY POINTS

1. We believe value creation through operational enhancements will be crucial to drive EBITDA and profitability.
2. The higher cost of debt is clearly a headwind for private equity (PE), but is not insurmountable.
3. In our view, companies in the middle market may be afforded a wider variety of exit opportunities .

[2024 Outlook: Multi-Sector Fixed Income, Return of the Core](#)

By: Vishal Khanduja, CFA | & Brian S. Ellis, CFA | December 19, 2023

A Myriad of Macroeconomic Drivers Are in Play; However, We See a Stronger Backdrop for Fixed Income Markets in 2024

KEY POINTS

1. A decade of extremely low interest rates followed by the Federal Reserve's aggressive policy normalization created a challenging environment for bond investors over the last two years. The breakdown of the inverse correlation between long-term, risk-free rates and spread sectors has led investors to rethink their fixed income allocations.
2. We see a compelling backdrop for fixed income in 2024, where inflation continues to decelerate, and higher interest rates continue to slow growth and the Fed clearly pivots from their restrictive stance. Under that scenario, we believe fixed income will return to its traditional role of providing investors with income and portfolio diversification.
3. We believe the Fed has ended its aggressive hiking cycle and has recently indicated their intention to pivot in 2024. We think the pace of inflation and magnitude of economic growth will keep monetary policy variable, aiding active fixed income managers.

[2024 Outlook: International Equity](#)

By: *Bruno Paulson* | *December 15, 2023*

Compounding Through the Hype with High Quality Equities

KEY POINTS

1. MSCI World Index's current forward multiple does not look cheap, particularly as it is based on an arguably optimistic, double-digit earnings growth assumption for 2024. Our view is that the possibility of a downturn is not reflected in today's earnings expectations, nor in the current market multiple.
2. We seek to avoid the permanent destruction of capital by focusing on high quality,¹ reasonably priced companies with earnings resilience and by resisting the urge to get caught up in potentially detrimental speculative bubbles.
3. Looking beyond the "Magnificent 7" stocks, we believe there will be "slow burners" for whom the benefits of generative artificial intelligence (GenAI), and AI in general, will take longer to emerge but could be significant over time. We believe these GenAI model users will be able to generate value for customers and/or reduce costs by virtue of their "Walled Gardens."

[2024 Outlook: Emerging Markets Equities](#)

By: *Jitania Kandhari* | *December 15, 2023*

Increased Heterogeneity in Economies and Markets

KEY POINTS

1. Increasing dispersion of returns in emerging markets (EM) countries enhances the appeal of active management.
2. We are taking active positions in countries and stocks based on our high-conviction views.
3. Growth, inflation and interest rates will remain important variables across different countries in 2024, as will elections as several countries go to the polls.

[2024 Outlook: Hedge Funds](#)

By: Mark van der Zwan | & Robert M. Rafter, CFA | December 14, 2023

A Changing Environment May Usher in a New Era for Absolute Return Investing

KEY POINTS

1. Falling inflation levels remain stickier above central bank targets, supporting price dispersion and hedge fund alpha opportunities across asset classes
2. Potential shift in central bank posture and cross-asset correlations may support more directional strategies.
3. We anticipate a structurally different regime in terms of inflation, interest rates, volatility and dispersion, as well as alpha opportunities over the medium term.

[HIGH CONVICTION ACTIVE](#) | OUTLOOK

[2024 Outlook: Global Equities](#)

By: Manas Gautam | December 12, 2023

Keep Calm & Carry On

KEY POINTS

1. We remain focused on company-specific fundamentals. While market conditions and macro events change year-to-year, company fundamentals drive share price appreciation over the long-term, which, across portfolio holdings, have largely remained healthy and in-line with our expectations.
2. We believe our companies are poised for growth. Many companies that suffered sharp declines in their share prices last year made the most of this slump by refocusing on the best opportunities and achieving profitability faster. In our view, these businesses have essentially de-risked themselves — and yet these improvements are not reflected in their current share prices.
3. We continue to assess the long-term implications of a higher cost of capital. We believe many companies that did not build sustainable businesses will start to run out of cash, thus reducing competition and benefiting companies that have already established valuable businesses and brands.

[2024 Outlook: Value Equity](#)

By: Aaron Dunn, CFA | & Bradley Galko, CFA | December 11, 2023

Normalization of Supply Chains May Create Opportunity for Value Investors

KEY POINTS

1. While inventory destocking has been deep and painful, we believe the slate is now clean for companies in sectors that have been beaten down due to this phenomenon. We also continue to closely watch what we term the GLP-1 (or weight-loss drug) reversion trade — our assumption being that consumer goods companies will still have a place when the dust settles.
2. We're focusing on company-specific opportunities within the industrials, basic materials, semiconductors, consumer and utilities sectors.
3. We believe rates will be higher for longer, and a balanced approach among equity allocations will be key in this regime where risk has a price.

[INVESTMENT GRADE FIXED INCOME](#) | [NAVIGATING THE CURVE](#) | [OUTLOOK](#)

[2024 Outlook: Agency Mortgage-Backed Securities](#)

By: *Andrew Szczurowski, CFA* | *December 8, 2023*

Limited Supply to Support Agency MBS Market in 2024

KEY POINTS

1. Agency mortgage-backed securities (MBS) spreads sit over 100 basis points (bps) wider than their 2021 lows. While spreads have been at historically wide levels for the last two years, an improving technical landscape in 2024 will likely pave the way for tighter spreads.
2. The average mortgage rate of existing homeowners with a mortgage sits at just 3.74% as of December 1, making it uneconomical for existing mortgage holders to move or refinance, dampening supply in the agency MBS market in 2024.
3. We expect the focus to shift in the agency MBS market from extension protection to call protection in 2024. With the specter of recession and credit defaults on the horizon, money manager demand for agency MBS is set to pick up in 2024.

[INVESTMENT GRADE FIXED INCOME](#) | [NAVIGATING THE CURVE](#) | [OUTLOOK](#)

[2024 Outlook: Investment Grade Credit](#)

By: Richard Ford | December 6, 2023

Investment Grade Credit Can Offer Attractive Income and Capital Preservation in Uncertain Times

KEY POINTS

1. We expect risk of recession and capital preservation to dominate the investment debate in 2024. Investment grade credit offers potential risk mitigation for when central banks move rates lower.
2. We believe corporates enter 2024 with conservative business models, having cut costs and raised liquidity in recent times. This makes high quality Fixed Income an attractive asset in uncertain times.
3. A global regime change characterized by de-globalization, higher structural inflation, quantitative tightening, increased geo-political risk and higher government debt, suggests 2024 is the start of a new era for investing.

[2024 Outlook: Responsible Investing](#)

By: John Streur | December 6, 2023

Market Decoupling of "E, S and G" Factors Likely to Accelerate in 2024

KEY POINTS

1. The shakeout in the responsible investment industry that began in late 2022 is driving specialist firms to increasingly incorporate financial viability into the analysis of corporate climate and social business objectives.
2. As both specialist firms and mainstream investors have moved towards more intensive and granular ESG research, a consensus is building around the importance of human capital management. In particular, a greater focus is being placed on workforce diversity in differentiating a company's potential for value creation.
3. Decarbonizing the global economy is proving to be a difficult task because the cost of transitioning from fossil fuels to clean energy is currently higher than originally anticipated.

[2024 Outlook: Municipal Bonds](#)

By: Craig R. Brandon, CFA | & Cynthia J. Clemson | December 6, 2023

High Stakes Tug-of-War in 2024

KEY POINTS

1. Elevated yields, low issuance and solid credit fundamentals could underpin a reversal of fund flows into municipals.
2. Positioning for a rally in high quality, longer duration bonds may be timely given where we are in this interest rate cycle.
3. The expectation for a significant decrease in yields across the curve is contingent on softer inflationary data and a more restrained Federal Reserve (Fed).

[2024 Outlook: Atlanta Capital](#)

By: Joe Hudepohl, CFA | & Lance Garrison, CFA | December 6, 2023

High Quality Stocks Offer Opportunity Amid a Sea of Market Noise and Volatility

KEY POINTS

1. Major equity indexes are at record levels of concentration, skewing index returns. This scenario provides an opportunity for active managers whose portfolios are differentiated from the benchmark to add value over the long term.
2. Inflation, interest rates, the Fed's balance sheet, credit issues and corporate earnings add to the sea of noise and volatility in the

marketplace. Moreover, macro uncertainty is heightened by geopolitical wars.

3. We believe high quality¹ companies with proven pricing power, leadership in secularly growing markets, and disciplined expense management are well positioned to navigate these volatile environments.

[2024 Outlook: Emerging Markets Debt](#)

By: Marshall L. Stocker, Ph.D., CFA | & Kyle Lee, CFA | December 6, 2023

Technical Tailwind Expected for Emerging Markets Debt in 2024

KEY POINTS

1. Many emerging markets (EM) central banks were early and more aggressive in tightening policy than their developed market peers, which is helping to tame inflation and opening the way for more growth-friendly policy.
2. We expect net inflows to rebound into EM debt in 2024, providing a technicals tailwind for the asset class.
3. The asset class remains susceptible to macro sensitivity, which places an added emphasis on in-depth country and company research to guide judicious credit selection.
