#### [Higher Volatility in 2024 May Present Attractive Entry Points for High Yield Bonds](#)

##### **KEY POINTS**

1. [As global central banks near the end of a historical cycle of tightening monetary policy, we believe a moderate recession is a more probable outcome in 2024.](#)
2. [Increasing dispersion in valuations across rating segments, sectors and individual issuers will continue to provide opportunity and the ability to capture attractive entry points.](#)
3. [We have maintained our cautious positioning and continue to prefer defensive sectors that trade wide of historical norms, such as health care, given the sector's historically defensive characteristics.](#)

### [Calvert's Research Process Examines PFAS Risk, Remediation](#)

By: [Emily Wagner, Alysia Rodgers](#) |  
January 17, 2024

[New York - The issue of per and polyfluoroalkyl substances, commonly referred to as "forever chemicals," is rapidly evolving, and requires a nuanced approach to evaluate risk to issuers, especially as KPIs specific to PFAS are lacking \(see our \[previous post\]\(#\) for more details\).](#) At Calvert, our research process allows us to apply a discount to reflect both the materiality on stakeholders (from investors, employees and customers to local communities) and the impact to an issuer's enterprise value (equity, holders, debt holders, bankruptcy). This also considers company actions/response to a controversy.

### [Calvert's Approach to Investing in the Energy Transition](#)

By: [Tarek Soliman](#) | & [Anuj Goyal](#) | November 8, 2023

The energy system powers every corner of the modern economy from oil for transport and chemicals, to natural gas for heating and industry, to coal for electricity generation and steel production. Oil and gas provide over 50% of world primary energy which rises to over 80% when including coal, forming the backbone of global supply today and highlighting the magnitude of the task of an energy system transformation.

This system keeps the world moving and powers economic activity, but it is prone to geopolitical disruption and price volatility. This volatility has highlighted long-term concerns that Calvert has long held about the extent to which the current global energy system relies on fossil fuels.
