

High Yield Strategy

Strategy Review

(as of Mar 31, 2024)

Investment Overview

We take an opportunistic, value-driven approach to high-yield investing, following a process that has been in place for 20 years.

- This strategy invests in all levels of debt across the corporate capital structure, from high-yield bank loans to high-yield convertible debt to high-yield preferreds.
 - Intensive credit research helps us to identify investment opportunities as value changes in the market.
 - We never turn a blind eye to risk, and have a record of excellent risk-adjusted returns.
 - Our experienced high-yield analysts have worked together through market cycles and are a cohesive unit.
 - The high yield team benefits from multiple sets of eyes on the issuers they consider by drawing on the pooled research of specialized teams of investment professionals across the globe
-

Portfolio Construction

Position sizing integrates analysts' recommendations with the portfolio managers' conviction and evaluation of the security's risk/return characteristics.

- Portfolio historically 250-300 issuers
 - Issuer concentration limited to 5 % of assets; 3 % typical
 - Focus on broad exposure
 - The top 10 issuers typically account for approximately 20 % of assets
-
