

U.S. Small-Cap Equity Strategy

Investment Overview

The Eaton Vance U.S. Small-Cap Strategy offers exposure to a broadly diversified portfolio of high quality, U.S. small cap companies.

Investment Philosophy

We focus on three definable inputs - Quality, Valuation, and Time (QVT). Our focus on quality drives a preference for well-entrenched franchises with durable and scalable business models, we believe can benefit from either structural growth (compounders) or structural change (improvers). We believe a disciplined combination of quality in a reward-to-risk framework with a long-term mindset can uncover sources of alpha in the broad and inefficient small cap universe.

Disclosure

IMPORTANT INFORMATION RISK CONSIDERATIONS There is no assurance that a Portfolio will achieve its investment objective. Portfolios are subject to market risk, which is the possibility that the market values of securities owned by the Portfolio will decline and may therefore be less than what you paid for them. Market values can change daily due to economic and other events (e.g. natural disasters, health crises, terrorism, conflicts and social unrest) that affect markets, countries, companies or governments. It is difficult to predict the timing, duration, and potential adverse effects (e.g. portfolio liquidity) of events. Accordingly, you can lose money investing in this Portfolio. Please be aware that this Portfolio may be subject to certain additional risks. In general, equities securities' values also fluctuate in response to activities specific to a company. Stocks of small-capitalization companies carry special risks, such as limited product lines, markets and financial resources, and greater market volatility than securities of larger, more established companies. Investors should be aware that this strategy may be subject to additional risks, which should be carefully considered prior to any investment decision.
