[2024 Outlook: High Yield Bonds](#)

By: [Stephen C. Concannon, CFA, Will Reardon](#) | December 6, 2023

[Higher Volatility in 2024 May Present Attractive Entry Points for High Yield Bonds](#)

KEY POINTS

1. [As global central banks near the end of a historical cycle of tightening monetary policy, we believe a moderate recession is a more probable outcome in 2024.](#)
2. [Increasing dispersion in valuations across rating segments, sectors and individual issuers will continue to provide opportunity and the ability to capture attractive entry points.](#)
3. [We have maintained our cautious positioning and continue to prefer defensive sectors that trade wide of historical norms, such as health care, given the sector's historically defensive characteristics.](#)

[Calvert's Research Process Examines PFAS Risk, Remediation](#)

By: [Emily Wagner, Alysia Rodgers](#) |
January 17, 2024

[New York - The issue of per and polyfluoroalkyl substances, commonly referred to as "forever chemicals," is rapidly evolving, and requires a nuanced approach to evaluate risk to issuers, especially as KPIs specific to PFAS are lacking \(see our \[previous post\]\(#\) for more details\).](#) At Calvert, our research process allows us to apply a discount to reflect both the materiality on stakeholders (from investors, employees and customers to local communities) and the impact to an issuer's enterprise value (equity, holders, debt holders, bankruptcy). This also considers company actions/response to a controversy.

[Brazilian Economy Boosted by Reasonable Government Legislations and Tight Monetary Policy](#)

By: [Paul Psaila](#) | February 5, 2024

KEY POINTS

1. [A year into President Lula's term, the political and economic situation in Brazil is better than many had expected.](#)
2. [The economy will likely grow more than expected as interest rates continue to fall.](#)
3. [We believe Brazil remains cheap compared to other emerging markets with lower inflation and rates acting as a tailwind for growth.](#)

[Property Insurance: The Canary in the Coal Mine for Physical Climate Risk](#)

By: *Pietro Marchesano* | February 15, 2024

The urgent need to reduce emissions has recently drawn a high level of scrutiny and interest from the financial services sector. Although physical climate risk is often mentioned less than transition risk, its effects will become increasingly evident over time. The insurance industry offers an important perspective on the evolving materiality of physical risk and ways to address it.

[Calvert's Research Process Examines PFAS Risk, Remediation](#)

By: *Emily Wagner* | & *Alysia Rodgers* | *January 17, 2024*

New York - The issue of per and polyfluoroalkyl substances, commonly referred to as "forever chemicals," is rapidly evolving, and requires a nuanced approach to evaluate risk to issuers, especially as KPIs specific to PFAS are lacking (see [our previous post](#) for more details). At Calvert, our research process allows us to apply a discount to reflect both the materiality on stakeholders (from investors, employees and customers to local communities) and the impact to an issuer's enterprise value (equity, holders, debt holders, bankruptcy). This also considers company actions/response to a controversy.

[2024 Outlook: Responsible Investing](#)

By: *John Streur* | *December 6, 2023*

Market Decoupling of "E, S and G" Factors Likely to Accelerate in 2024

KEY POINTS

1. The shakeout in the responsible investment industry that began in late 2022 is driving specialist firms to increasingly incorporate financial viability into the analysis of corporate climate and social business objectives.
2. As both specialist firms and mainstream investors have moved towards more intensive and granular ESG research, a consensus is building around the importance of human capital management. In particular, a greater focus is being placed on workforce diversity in differentiating a company's potential for value creation.
3. Decarbonizing the global economy is proving to be a difficult task because the cost of transitioning from fossil fuels to clean energy is currently higher than originally anticipated.

[Calvert's Approach to Investing in the Energy Transition](#)

By: *Tarek Soliman* | & *Anuj Goyal* | November 8, 2023

The energy system powers every corner of the modern economy from oil for transport and chemicals, to natural gas for heating and industry, to coal for electricity generation and steel production. Oil and gas provide over 50% of world primary energy which rises to over 80% when including coal, forming the backbone of global supply today and highlighting the magnitude of the task of an energy system transformation. This system keeps the world moving and powers economic activity, but it is prone to geopolitical disruption and price volatility. This volatility has highlighted long-term concerns that Calvert has long held about the extent to which the current global energy system relies on fossil fuels.

[Common Ground Between Anti-ESG Politics and Responsible Investors](#)

By: *John Streur* | October 2, 2023

Washington - "Anti ESG" stories have been prominent for several months in the United States and we are also beginning to see written policy agendas and proposed legislation. As a global leader in Responsible Investing, we believe it is important to listen carefully to both sides of the ESG debate and eliminate the noise at the extreme. When we focus on what is actually being proposed, shared principles stand out that offer the potential to help evolve and improve responsible investment implementation. Frankly, the debate highlights opportunities to strengthen ESG investing, improve market function and solve long standing problems associated with weak definitions of "ESG" in the investment context.

[New Report Affirms Sustainable Fund Outperformance in First Half of 2023](#)

By: *John Farley* | September 13, 2023

New York - The new "Sustainable Reality" report from the Morgan Stanley Institute for Sustainable Investing affirms the resurgence of performance and interest in environmental, social and governance (ESG) funds in the first half of 2023. The trends identified in the report support Calvert's long-held views on markets and investor interests:

[Financial Materiality of PFAS Is Rising](#)

By: *Emily Wagner* | & *Kara Huang* | *September 7, 2023*

New York - At Calvert, one ESG issue we examine that is material to a wide range of companies is the use of per and polyfluoroalkyl substances (PFAS). These are a group of widely used chemicals valued for their versatility in repelling or resisting grease, oil, water and heat. Because they do not break down over time, they are commonly referred to as "Forever Chemicals" and are now widely used in applications like firefighting foams, water-resistant fabric and textiles, non-stick cookware and personal care products. Due to this ubiquitous use, PFAS chemicals can be found in water, air, fish and soil across the globe and have been found in blood levels of people and animals.
