#### [Higher Volatility in 2024 May Present Attractive Entry Points for High Yield Bonds](#)

##### **KEY POINTS**

- [1. As global central banks near the end of a historical cycle of tightening monetary policy, we believe a moderate recession is a more probable outcome in 2024.](#)
- [2. Increasing dispersion in valuations across rating segments, sectors and individual issuers will continue to provide opportunity and the ability to capture attractive entry points.](#)
- [3. We have maintained our cautious positioning and continue to prefer defensive sectors that trade wide of historical norms, such as health care, given the sector's historically defensive characteristics.](#)

### [Calvert's Research Process Examines PFAS Risk, Remediation](#)

By: [Emily Wagner, Alysia Rodgers](#) |

January 17, 2024

[New York - The issue of per and polyfluoroalkyl substances, commonly referred to as "forever chemicals," is rapidly evolving, and requires a nuanced approach to evaluate risk to issuers, especially as KPIs specific to PFAS are lacking \(see our \[previous post\]\(#\) for more details\). At Calvert, our research process allows us to apply a discount to reflect both the materiality on stakeholders \(from investors, employees and customers to local communities\) and the impact to an issuer's enterprise value \(equity, holders, debt holders, bankruptcy\). This also considers company actions/response to a controversy.](#)

- [1. A year into President Lula's term, the political and economic situation in Brazil is better than many had expected.](#)
- [2. The economy will likely grow more than expected as interest rates continue to fall.](#)
- [3. We believe Brazil remains cheap compared to other emerging markets with lower inflation and rates acting as a tailwind for growth.](#)

### [2024 Outlook: Emerging Markets Debt](#)

By: *Marshall L. Stocker, Ph.D., CFA* | & *Kyle Lee, CFA* | December 6, 2023

**Technicals Tailwind Expected for Emerging Markets Debt in 2024**

#### KEY POINTS

1. Many emerging markets (EM) central banks were early and more aggressive in tightening policy than their developed market peers, which is helping to tame inflation and opening the way for more growth-friendly policy.
2. We expect net inflows to rebound into EM debt in 2024, providing a technicals tailwind for the asset class.
3. The asset class remains susceptible to macro sensitivity, which places an added emphasis on in-depth country and company research to guide judicious credit selection.
