The portfolio profile is subject to change due to active management. Percentages may not total 100 % due to rounding.

The use of leverage increases risks, such that a relatively small movement in the value of an investment may result in a disproportionately large movement, unfavorable as well as favorable, in the value of that investment and, in turn, the value of the Fund.

The Fund is actively managed in reference to the Index (MSCI Emerging Markets Index). The Fund does not intend to track the Index. The Investment Adviser has discretion in its choices of investments and is not constrained in its selection of its investments by the Index save that the Investment Adviser may place parameters on country and country-sector weights relative to the Index. These parameters may change from time to time. The Investment Adviser may also set expected volatility and tracking error parameters relative to the Index which may be subject to change. The Fund may invest in instruments which are not included in the Index, although it is generally expected that a significant portion of its investments will be constituents of the Index at any given time.

The investment objective of the Fund is to seek long-term capital appreciation. The Fund is actively managed and seeks to achieve its objective by investing in a diversified portfolio of common stocks of companies which are domiciled in or which derive more than 50% of their revenues or profits from emerging market countries. The Fund may also invest in other transferable securities listed, traded or dealt on Recognised Markets in accordance with the restrictions listed under "Investment Objectives and Policies" in the Prospectus. The Fund will invest at least two-thirds of its total assets in equity securities of companies which are domiciled in or which derive more than 50% of their revenues or profits from emerging market countries. Equity securities, for the purposes of this two-thirds policy, will be limited to common and preferred stocks; equity interests in trusts, partnerships, joint ventures and other unincorporated entities or enterprises; special classes of shares available only to foreign investors in markets that restrict ownership by foreign investors to certain classes of equity securities (e.g. India, Kuwait, Thailand); and participation notes.

RISK CONSIDERATIONS

The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.
