Monthly Update
Feb 29, 2024

The Fund

Unconstrained to a traditional benchmark, this Fund is one of the industry's longest-running absolute return strategies. Implements a flexible approach to investing long and short in foreign markets, providing global exposure that may help counterbalance performance swings in conventional holdings.

The Approach

Eaton Vance applies its global macroeconomic and political research process in directing Fund investments. This time-tested process informs long and short positions in sovereign asset classes, such as foreign currencies and sovereign credit markets. Managers consider relative risk and return in managing exposures.

The Features

A flexible mandate translates into investment opportunities in both improving and deteriorating markets. Historically has provided a low volatility, strong, risk-adjusted performance experience. Historically low beta may help the Fund complement traditional holdings. Managed by Eaton Vance, a global investing leader.

Overview

Historical Returns (%)

as of Mar 31, 2024

04/30/2024

03/31/2024

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Total return prior to the commencement of the class reflects returns of another Fund class. Prior returns are adjusted to reflect applicable sales charge (but were not adjusted for other expenses). If adjusted for other expenses, returns would be lower. Max Sales Charge: 1%.

Time Period	Rating	Funds in Nontraditional Bond Category
Overall	★★★★★	278
3 Years	★★★★★	278
5 Years	★★★★★	250
10 Years	★★★★★	161

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

Portfolio Management

Kyle Lee, CFA	Managed Fund since 2021
Patrick Campbell, CFA	Managed Fund since 2021
Federico Sequeda, CFA	Managed Fund since 2021
Hussein Khattab, CFA	Managed Fund since 2022

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. Fund primarily invests in an affiliated investment company (Portfolio) with the same objective(s) and policies as the Fund and may also invest directly. References to investments are to the aggregate holdings of the Fund and the Portfolio.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The Fund employs an "absolute return" investment approach, benchmarking itself to an index of cash instruments and seeking to achieve returns that are largely independent of broad movements in stocks and bonds. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging or frontier countries, these risks may be more significant. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. As interest rates rise, the value of certain income investments is likely to decline. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares

may fluctuate more than a fund with less exposure to such areas. A nondiversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund.

See the Fund's prospectus for information related to a primary benchmark index selected (if applicable) to comply with a regulation that requires the Fund's primary benchmark to represent the overall applicable market.

Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

- 1. Source: Fund prospectus.
- 2. The Morningstar Nontraditional Bond Category includes funds that pursue strategies divergent in one or more ways from conventional practice in the broader bond-fund universe. This includes funds that invest in bonds with an absolute return focus, which seek to avoid losses and produce returns uncorrelated to the overall bond market, and funds with unconstrained mandates. Typically these strategies tactically manage allocations and often utilize derivatives.
- 3. SEC 30-day yield is a standardized measure based on the estimated yield to maturity of a fund's investments over a 30-day period and is based on the maximum offer price at the date specified. The SEC 30-day yield is not based on the distributions made by the fund, which may differ. Distribution Rate at NAV is calculated by dividing the last distribution paid per share (annualized) by NAV. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.
- 4. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

Credit Quality (%)⁵

as of Mar 31, 2024

03/31/2024

Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The Fund employs an "absolute return" investment approach, benchmarking itself to an index of cash instruments and seeking to achieve returns that are largely independent of broad movements in stocks and bonds. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging or frontier countries, these risks may be more significant. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated

with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. As interest rates rise, the value of certain income investments is likely to decline. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares may fluctuate more than a fund with less exposure to such areas. A nondiversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund.

See the Fund's prospectus for information related to a primary benchmark index selected (if applicable) to comply with a regulation that requires the Fund's primary benchmark to represent the overall applicable market.

Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

5. Percent of bond holdings.

6. Based on notional exposure as percentage of net assets.

7. Spread duration is the sensitivity of a bond's price given changes in yield spreads. Based on option-adjusted credit spread duration relative to net assets.

8. Based on option-adjusted interest-rate duration relative to net assets.

9. Foreign currency based on notional exposure as percentage of net assets. Credit spread duration is the sensitivity of a bond's price given changes in yield spreads. Based on option-adjusted credit spread duration relative to net assets. Interest rate based on option-adjusted interest-rate duration relative to net assets.

Management

Kyle Lee, CFA

Managing Director, Co-Head of Emerging Markets
Joined Eaton Vance 2007

Biography

Kyle is the Co-Head of Emerging Markets and portfolio manager on the Emerging Markets team. He is responsible for co-leading the team of investment professionals based in Boston, Washington, D.C., London, and Singapore, as well as for buy and sell decisions, portfolio construction, and risk management for assets in emerging and frontier markets.

He began his career in the investment management industry with Eaton Vance in 2007. Morgan Stanley acquired Eaton Vance in March 2021.

Kyle earned a B.A. from Wesleyan University and is a CFA charterholder.

Hussein Khattab is a portfolio manager on the Emerging Markets team. He is responsible for buy and sell decisions, portfolio construction and risk management for the team's emerging markets strategies. He is focused on the analysis of macroeconomics, politics and financial markets of Central and Eastern Europe, the Middle East and Africa, and the management of regional investments in various emerging markets portfolios. He began his career in the investment management industry with Eaton Vance in 2013. Morgan Stanley acquired Eaton Vance in March 2021.

Hussein earned a BEngineering from the American University of Beirut and an M.S. in mathematical finance from Boston University. He is a CFA charterholder.
