The Fund

The Fund seeks long-term capital appreciation by investing primarily in equity securities of companies that are located within the Greater China region, which includes Hong Kong, China and Taiwan. The Fund invests in companies with a broad range of market capitalizations, including smaller companies.

The Approach

The Fund generally invests in China-region companies that are expected to grow in value over time, regardless of short-term market fluctuations. The Fund's stock selection process seeks to identify companies with sound and well-established management, financial strength, a history of earnings growth, sustainable long-term demand trends, attractive stock valuations and other characteristics.

The Features

The Fund provides investors access to a range of companies with the potential to benefit from the economic growth and development of China. Political reform, rising wealth levels, increased standards of living and other factors have created investment opportunities in the China region. Fund has the ability to invest in companies with a broad range of market capitalizations.

Overview

Historical Returns (%)

as of Dec 31, 2023

02/29/2024

12/31/2023

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Total return prior to the commencement of the class reflects returns of another Fund class. Prior returns are adjusted to reflect applicable sales charge (but were not adjusted for other expenses). If adjusted for other expenses, returns would be lower. The share class has no sales charge.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. China region economies are export-driven and can be affected by developments in the economies of their major trading partners. Governmental actions in China can have a significant affect on economic conditions in that region. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares may fluctuate more than a fund with less exposure to such areas. A nondiversified fund may be subject to greater risk by investing in a smaller number of investments than a diversified fund. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. The MSCI China Index captures large and mid-cap representation across China A-shares, B-shares, H-shares, Red-chips and P-chips. It reflects the Mainland China and Hong Kong opportunity set from an international investor's perspective. Prior to December 31, 2022, the fund measured its performance against the MSCI Golden Dragon Index.
2. MSCI Golden Dragon Index is an unmanaged index of common stocks traded in China, Hong Kong and Taiwan. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund. MSCI indexes are net of foreign withholding taxes. Source: MSCI. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder.

Morningstar Rating™

as of Feb 29, 2024

Time Period	Rating	Funds in China Region Category
Overall	★★★★	95
3 Years	★★★★	95
5 Years	★★★	75
10 Years	★★★★	51

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.
