## The Fund

This offering provides exposure to the Pennsylvania municipal bond market, seeking to provide Fund shareholders with current income exempt from regular federal income tax and state personal income tax. Fund investments span municipal sectors, with allocations directed by the portfolio manager.

## The Approach

The Fund's active management draws upon the expertise of Eaton Vance's municipal bond team, among America's largest and most experienced municipal bond managers. The investment team applies Eaton Vance's credit research process.

## The Features

Eaton Vance's decades of municipal market experience informs the Fund's strategy. Ongoing credit monitoring helps mitigate risk.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Fund performance during certain periods reflects the strong bond market performance and/or the strong performance of bonds held during those periods. This performance is not typical and may not be repeated. Total return prior to the commencement of the class reflects returns of another Fund class. Prior returns are adjusted to reflect applicable sales charge (but were not adjusted for other expenses). If adjusted for other expenses, returns would be lower. The share class has no sales charge.

## Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Muni Pennsylvania Category
Overall	★★★★★	50
3 Years	★★★★★	50
5 Years	★★★★★	48
10 Years	★★★★★	41

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

## RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. There generally is limited public information about municipal issuers. As interest rates rise, the value of certain income investments is likely to decline. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Because the Fund may invest significantly in a particular state, the Fund share value may fluctuate more than a fund with less exposure to such state. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

5. The Morningstar Muni Pennsylvania Category includes funds that invest at least 80% of its assets in state and local government bonds free from both federal and Pennsylvania state taxes.

6. For National Municipal Funds, taxable-equivalent performance is calculated using a 40.8% tax rate (equals maximum individual federal tax rate adjusted for the Medicare surtax). For Single-State Municipal Funds, taxable-equivalent performance also reflect maximum effective individual state income tax rates. Local income taxes that may apply are not considered. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.

7. Distribution Rate at NAV and Market Price is calculated by dividing the last distribution paid per share (annualized) by NAV or market price, respectively. For National Municipal Funds, Taxable-Equivalent Distribution Rate at NAV and Market Price is calculated using a 40.8% tax rate (equals maximum individual federal tax rate adjusted for the Medicare surtax). For Single-State Municipal Funds, Taxable-Equivalent Distribution Rates also reflect maximum effective individual state income tax rates. Local income taxes that may apply are not considered.

8. SEC 30-day yield is a standardized measure based on the estimated yield to maturity of a fund's investments over a 30-day period and is based on the maximum offer price at the date specified. The SEC 30-day yield is not based on the distributions made by the fund, which may differ. Distribution Rate at NAV is calculated by dividing the last distribution paid per share (annualized) by NAV. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.

9. The Fund's distributions may be comprised of tax-exempt income, ordinary income, net realized capital gains and return of capital. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.
