The Fund

This all-weather, multi-sector Fund provides sweeping exposure to fixed-income markets, offering a core holding that may complement traditional bond market investments. Access to a broad range of typically underrepresented asset classes, with allocations directed by Fund portfolio managers.

The Approach

A time-tested, macroeconomic and fundamental research process informs investments across a range of leading Eaton Vance fixed-income capabilities. Broad exposure to a global opportunity set and an eye toward risk-adjusted performance seeks to provide a low volatility experience.

The Features

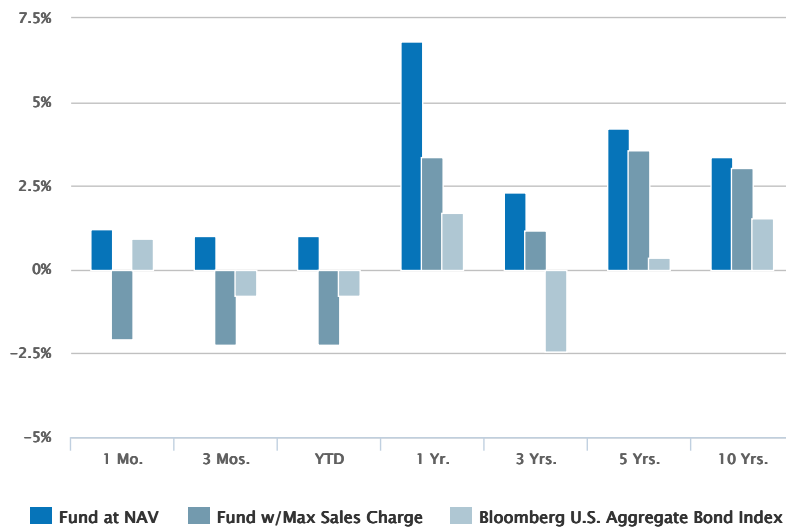

The Fund's broad exposure and flexible allocations to floating-rate loans, non-investment-grade bonds, mortgage-backed securities, currency instruments and foreign bonds, among other instruments, may provide important diversification benefits for investor portfolios. Managed by Eaton Vance, a leader in fixed income investing.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Max Sales Charge: 3.25%.

Adjusted Expense Ratios excludes certain investment expenses such as interest expense from borrowings and repurchase agreements and dividend expense from short sales, incurred directly by the Fund or indirectly through the Fund's investment in underlying Eaton Vance Funds, if applicable none of which are paid to Eaton Vance.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Multisector Bond Category
Overall	★★★★★	315
3 Years	★★★★★	315
5 Years	★★★★★	265
10 Years	★★★★	171

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. Fund primarily invests in one or more affiliated investment companies (Portfolios) and may also invest directly. Unless otherwise noted, references to investments are to the aggregate holdings of the Fund, including its pro rata share of each Portfolio or Fund in which it invests.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The Fund invests in other underlying funds in a fund-of-funds structure. The Fund's performance is dependent upon the performance of the underlying funds and the Fund is subject to all of the risks of the underlying funds. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. Loans are traded in a private, unregulated inter-dealer or inter-bank resale market and are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans (thus affecting their liquidity) and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. Due to the possibility of an extended loan settlement process, the Fund may hold cash, sell investments or temporarily borrow from banks or other lenders to meet short-term liquidity needs. Loans may be structured such that they are not securities under securities law, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. Loans are also subject to risks associated with other types of income investments. As interest rates rise, the value of certain income investments is likely to decline. Mortgage- and asset-backed securities are subject to credit, interest rate, prepayment and extension risk. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares may fluctuate more than a fund with less exposure to such areas.

The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Effective January 16, 2024, the Fund changed its name from Eaton Vance Short Duration Strategic Income Fund to Eaton Vance Strategic Income Fund, and amended its principal investment strategy to no longer limit its average duration under normal market conditions to 3.5 years or less. See the related prospectus supplement for details.

2. Bloomberg U.S. Aggregate Bond Index is an unmanaged index of domestic investment-grade bonds, including corporate, government and mortgage-backed securities. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

Morningstar Rating™

as of Mar 31, 2024

Time Period	Rating	Funds in Multisector Bond Category
Overall	★★★★★	315
3 Years	★★★★★	315
5 Years	★★★★★	265
10 Years	★★★★	171

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load. Hollow stars denote Morningstar Extended Performance Ratings and are considered estimates based on the performance of the fund's oldest share class, adjusted for fees and expenses.

2. Bloomberg U.S. Aggregate Bond Index is an unmanaged index of domestic investment-grade bonds, including corporate, government and mortgage-backed securities. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.
3. Source: Fund prospectus.
4. Multisector-bond portfolios seek income by diversifying their assets among several fixed-income sectors, usually U.S. government obligations, U.S. corporate bonds, foreign bonds, and high-yield U.S. debt securities. These portfolios typically hold 35% to 65% of bond assets in securities that are not rated or are rated by a major agency such as Standard & Poor's or Moody's at the level of BB (considered speculative for taxable bonds) and below.
5. SEC 30-day yield is a standardized measure based on the estimated yield to maturity of a fund's investments over a 30-day period and is based on the maximum offer price at the date specified. The SEC 30-day yield is not based on the distributions made by the fund, which may differ. Distribution Rate at NAV is calculated by dividing the last distribution paid per share (annualized) by NAV. The Fund's monthly distribution may be comprised of ordinary income, net realized capital gains and returns of capital.
6. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.

BBB	6.12
BB	12.62
B	14.45
CCC or Lower	4.35
Not Rated	1.37

Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the highest rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

RISK CONSIDERATIONS

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The Fund invests in other underlying funds in a fund-of-funds structure. The Fund's performance is dependent upon the performance of the underlying funds and the Fund is subject to all of the risks of the underlying funds. Investments in debt instruments may be affected by changes in the creditworthiness of the issuer and are subject to the risk of non-payment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. Investments rated below investment grade (sometimes referred to as "junk") are typically subject to greater price volatility and illiquidity than higher rated investments. Loans are traded in a private, unregulated inter-dealer or inter-bank resale market and are generally subject to contractual restrictions that must be satisfied before a loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell loans (thus affecting their liquidity) and may negatively impact the transaction price. It may take longer than seven days for transactions in loans to settle. Due to the possibility of an extended loan settlement process, the Fund may hold cash, sell investments or temporarily borrow from banks or other lenders to meet short-term liquidity needs. Loans may be structured such that they are not securities under securities law, and in the event of fraud or misrepresentation by a borrower, lenders may not have the protection of the anti-fraud provisions of the federal securities laws. Loans are also subject to risks associated with other types of income investments. As interest rates rise, the value of certain income investments is likely to decline. Mortgage- and asset-backed securities are subject to credit, interest rate, prepayment and extension risk. Investments in foreign instruments or currencies can involve greater risk and volatility than U.S. investments because of adverse market, economic, political, regulatory, geopolitical, currency exchange rates or other conditions. In emerging countries, these risks may be more significant. The Fund's exposure to derivatives involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other investments. Derivatives instruments can be highly volatile, result in leverage (which can increase both the risk and return potential of the Fund), and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. If a counterparty is unable to honor its commitments, the value of Fund shares may decline and/or the Fund could experience delays in the return of collateral or other assets held by the counterparty. The value of commodities investments will generally be affected by overall market movements and factors specific to a particular industry or commodity, including weather, embargoes, tariffs, or health, political, international and regulatory developments. Because the Fund may invest significantly in a particular geographic region or country, value of Fund shares may fluctuate more than a fund with less exposure to such areas.

The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

7. Percent of total net assets.

8. Other net assets represent other assets less liabilities and includes any investment type that represents less than 1% of net assets. Any securities sold short will be subtracted from that corresponding asset.

9. Other than its asset allocation to Absolute Return, references to investments are to the aggregate holdings of the Fund-of-Funds, including its pro rata

share of each Portfolio in which it invests.

10. Percent of bond holdings.

Management

Andrew Szczurowski, CFA

Managing Director, Co-Head of Mortgage
& Securitized
Joined Eaton Vance 2007

Biography

Andrew Szczurowski is Co-Head of the Mortgage and Securitized investment team and a portfolio manager on Mortgage and Securitized investment team. He joined Eaton Vance in 2007. Morgan Stanley acquired Eaton Vance in March 2021. Previously at Eaton Vance, he was a portfolio manager on Eaton Vance's Global Income team, responsible for buy and sell decisions, portfolio construction, and risk management for the firm's mortgage-backed strategies.

Andrew began his career in the investment industry in 2005. Before joining Eaton Vance, he was affiliated with BNY Mellon. Andrew earned a B.S., cum laude, from the Peter T. Paul College of Business and Economics at the University of New Hampshire. He holds the Chartered Financial Analyst designation and is a member of the CFA Society Boston.

This image indicates content designed specifically for Financial Advisors / Investment Professionals. This material is not to be used with the public.

Before investing in any Eaton Vance, Calvert or Morgan Stanley Investment Management Inc.-advised fund, prospective investors should consider carefully the investment objective(s), risks, and charges and expenses. Read the prospectus carefully before you invest or send money. For **open-end mutual funds**, the current prospectus contains this and other information. To obtain an **open-end mutual fund** prospectus or summary prospectus and the most recent annual and semiannual shareholder reports, contact your financial advisor or [download a copy here](#). For **closed-end funds**, you should contact your financial advisor. To obtain the most recent annual and semi-annual shareholder report for a closed-end fund contact your financial advisor or [download a copy here](#). To obtain an **exchange-traded fund**, ("ETF") prospectus or summary prospectus, contact your financial advisor or [download a copy here](#).

Before purchasing any **variable product**, consider the objectives, risks, charges, and expenses associated with the underlying investment option(s) and those of the product itself. For a prospectus containing this and other information, contact your investment or insurance professional. Read the prospectus carefully before investing.
