## Disclosures

While the Trusts will seek to provide tax-advantaged monthly distributions to income beneficiaries growing over time with inflation and increasing amounts available for charitable purposes upon termination of beneficiaries' income interests, the Trusts' overall investment results are subject to market risk and are not guaranteed by any person. Distributions to income beneficiaries may fluctuate with changes in economic conditions, may not grow over time at rates consistent with inflation and may decline. The tax character of distributed Trust income may vary. The principal amount available for charitable purposes upon termination of a Trust Account's income interests may be higher or lower than the value of the Trust Account at initial funding.

Past performance is no guarantee of future results. Performance is for the stated time periods only; due to market volatility, the Trust's current performance may be lower or higher than quoted. Total Return is calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Income Return represents the portion of Total Return attributable to distributions. Principal Return represents the portion of Total Return attributable to change in NAV. Total Return and Income Return are stated net of foreign taxes on dividends received on non-U.S. investments. Trust income beneficiaries are generally eligible to receive a federal income tax credit or an itemized deduction for their attributable share of unrecovered foreign withholding tax. Performance for time periods less than or equal to one year is cumulative.
