Overview

Historical Returns (%)

as of Mar 31, 2019

	1 Mo.	3 Mos.	YTD	1 Yr.	3 Yrs.	5 Yrs.	10 Yrs.
Fund at NAV	3.79	17.20	17.20	20.14	16.84	13.22	16.75
Russell 1000® Growth Index ¹	2.85	16.10	16.10	12.75	16.53	13.49	17.51

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Performance prior to December 31, 2016 reflects the performance of the Fund's former adviser, Calvert Investment Management, Inc. The share class has no sales charge.

Morningstar Rating™

as of Mar 31, 2019

Time Period	Rating	Funds in Large Growth Category
Overall	★★★★	1256
3 Years	★★★★	1256
5 Years	★★★★	1114
10 Years	★★★★	805

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds and exchange-traded funds) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Star ratings do not reflect the effect of any applicable sales load.

Portfolio Management

Joseph B. Hudepohl, CFA	Managed Fund since 2015
Lance V. Garrison, CFA	Managed Fund since 2015
Jeffrey A. Miller, CFA	Managed Fund since 2015
Robert R. Walton, Jr., CFA	Managed Fund since 2015

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. Portfolio characteristics exclude 39 securities in Calvert's Special Equities program, which represent 0.870% of the portfolio and 3 securities in Calvert's High Impact Investments program, which represented 0.608% of the portfolio, both as of 12/31/2018. The Special Equities program enables the Fund to promote approaches to responsible investment goals through privately placed investments. High Social Impact Investments are investments that, in the Adviser's opinion, offer the opportunity for significant sustainability and social impact. These investments are generally illiquid and involve high risks. See the Fund's prospectus for details and calvert.com for a complete list of Fund holdings.

About Risk:

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Russell 1000® Growth Index is an unmanaged index of U.S. large-cap growth stocks. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the

past or future performance of the fund.

2. Source: Fund prospectus.

3. Net expense ratio reflects a contractual expense reimbursement that continues through 1/31/20. Without the reimbursement, if applicable, performance would have been lower.

4. Top 10 Holdings excludes cash and equivalents.

5. Percent of total net assets.

Portfolio profile subject to change due to active management. Percentages may not total 100% due to rounding. Portfolio characteristics exclude 39 securities in Calvert's Special Equities program, which represent 0.870% of the portfolio and 3 securities in Calvert's High Impact Investments program, which represented 0.608% of the portfolio, both as of 12/31/2018. The Special Equities program enables the Fund to promote approaches to responsible investment goals through privately placed investments. High Social Impact Investments are investments that, in the Adviser's opinion, offer the opportunity for significant sustainability and social impact. These investments are generally illiquid and involve high risks. See the Fund's prospectus for details and calvert.com for a complete list of Fund holdings.

About Risk:

The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the [Fund prospectus](#) for a complete description.

1. Russell 1000® Growth Index is an unmanaged index of U.S. large-cap growth stocks. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

2. Source: Fund prospectus.

3. Net expense ratio reflects a contractual expense reimbursement that continues through 1/31/20. Without the reimbursement, if applicable, performance would have been lower.

6. The Morningstar Large Growth Category includes funds that invest primarily in U.S. large-cap companies with growth characteristics such as high earnings growth and high valuations (high

price ratios and low dividend yields).

7. Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

8. A portion of the Fund's returns may be comprised of return of capital or short term capital gains. The Fund will determine the tax characteristics of all Fund distributions after the end of the calendar year and will provide shareholders such information at that time. Please consult your tax advisor for further information.
